#### Court Decisions Directly Relevant

None

#### Analysis of the Rule - Rule Effect - Reason for the Rule

Section 289.67 (2) (de), Stats., as created by 2009 Wisconsin Act 28 (the 2009-2011 biennial budget bill), requires the department to promulgate by rule definitions of “large quantity generator” and “small quantity generator” for purposes of the hazardous waste generator fees established by s. 289.67 (2) (b) 1., Stats., as amended by 2009 Wisconsin Act 28. This proposed rule adds a definition of “large quantity generator” and revises the definition of “small quantity generator” in ch. NR 660. Under current hazardous waste rules, standards are set for large quantity and small quantity hazardous waste generators, so their status is functionally described, but there are no specific, comprehensive definitions of these terms. Similarly, there is no specific definition of “large quantity generator” in the U.S. Environmental Protection Agency’s hazardous waste regulations in 40 CFR § 260.10, upon which s. NR 660.10 is based. Large quantity generator status is functionally described in text in 40 CFR Part 262, *Standards Applicable to Generators of Hazardous Waste*. 40 CFR § 260.10, includes a definition of “small quantity generator” but the definition is incomplete. Small quantity generator status is functionally described in text in 40 CFR Part 262. The department proposes to add explicit, complete definitions of large and small quantity generators to s. NR 660.10 based on the state and federal functional definitions.

#### Agency Procedures for Promulgation

Public hearings, Natural Resources Board final adoption, followed by legislative review.

#### Description of any Forms (attach copies if available)

None
