No comments were received.	
13. Identify the Local Governmental Units that Participated in the Development of this EIA. No local governmental units participated in the development of this EIA.	
14. Summary of Rule's Economic and Fiscal Impact on Specific Businesses, Business Sectors, Public Utility Rate Payers, Local Governmental Units and the State's Economy as a Whole (Include Implementation and Compliance Costs Expected to be Incurred) The proposed rule will not have a significant impact on specific businesses, business sectors, public utility rate payers, local governmental units, or the state's economy as a whole. The Department estimates one-time administrative costs of \$653.03. These costs may be absorbed in the agency budget.	
15. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule The benefit to implementing the rule is established standards of conduct for providing psychological services using telehealth. If the rule is not implemented, these standards will remain unclear.	
16. Long Range Implications of Implementing the Rule The long range implication of implementing the rule is established standards of conduct for providing psychological services using telehealth.	

## ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

---

17. Compare With Approaches Being Used by Federal Government  
None.

---

18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

Illinois: Illinois Statute provides that telehealth includes telemedicine and the delivery of health care services provided by way of an interactive telecommunications system. Illinois law further provides that “[a] health care professional treating a patient located in this State through telehealth must be licensed or authorized to practice in Illinois.” Practice of telehealth in Illinois is limited to the extent of the practitioner’s scope of practice as established in his or her respective licensing and consistent with the standards of care for in-person services. Psychologists are included in the definition of “health care professionals.”

Iowa: Iowa law defines telehealth as “...the delivery of health care services through the use of interactive audio and video.” “Telehealth” does not include the delivery of health care services through an audio-only telephone, electronic mail message, or facsimile transmission. Services must comply all rules adopted by the appropriate professional licensing board, having oversight of the health care professional providing the health care services. Mental health is included in the delivery of health care services.

Michigan: Michigan law defines “telemedicine” in their insurance code as the use of an electronic media to link patients with health care professionals in different locations. To be considered telemedicine under this section, the health care professional must be able to examine the patient via a statutorily compliant, secure interactive audio or video, or both, telecommunications system. Psychologists are included in the definition of “health care professionals.”

Minnesota: Minnesota’s Governor issued an Executive Order authorizing and requesting “... out-of state mental healthcare providers who hold a current license, certificate, or other permit in good standing issued by a state of the United States or the District of Columbia evidencing the meeting of qualifications and competencies for licensees to render aid involving those skills in Minnesota by telehealth to meet the needs of this emergency.” Out-of-state practitioners must submit to the jurisdiction of the Minnesota health related regulatory and licensing boards. The relevant board may revoke a provider’s authorization to practice under this Executive Order at the board’s discretion. Minnesota’s telehealth law applies to physicians and is silent as to psychologists practicing telehealth.
