

Notice of Preliminary Hearing on Statement of Scope

The Department of Natural Resources announces that it will hold a preliminary public hearing on Statement of Scope SS 021-22 (Board Order DG-04-22), which affects ch. NR 140, and is related to setting numerical standards to minimize the concentration of polluting substances in groundwater (Cycle 10 Bacteria), at the virtual time and place shown below.

Rule Information

The proposed rule will amend ch. NR 140, Wis. Adm. Code, to replace the existing total coliform bacteria standards with new state groundwater quality standards for Escherichia coli (E. coli) bacteria. The proposed rule will also transition total coliform bacteria from a public health groundwater quality standard to an indicator parameter.

The purpose of establishing groundwater standards is to protect public health. Some types of E. coli bacteria, when consumed, can cause acute (short-term) gastrointestinal illnesses causing diarrhea, abdominal discomfort, nausea, and vomiting. Less common effects are chronic (long-term) and include kidney failure, hepatitis, and bloody diarrhea. E. coli bacteria are a subgroup of coliform bacteria and are considered to be a much more specific indicator of fecal contamination, and the potential for pathogens to be present in drinking water, than total coliform bacteria.
