Health Insurance Risk-Sharing Plan

The state's health insurance risk-sharing plan (HIRSP) offers health insurance coverage to individuals with adverse medical histories and others who cannot obtain affordable health care coverage from the private sector. This paper provides information on HIRSP, including: (a) eligibility requirements; (b) covered services; (c) program funding; and (d) selected participation and utilization data. The paper also describes the responsibilities of the Board of Governors and the Department of Health and Family Services (DHFS) in administering HIRSP.

Eligibility Requirements

Wisconsin residents are eligible to enroll in HIRSP as a result of having health insurance coverage rejected or limited by an insurer, as a result of having certain specific diseases or disabilities, or as a result of the loss of employer-sponsored health care coverage.

Eligibility as a Result of Action by an Insurer. Individuals under the age of 65 may apply for enrollment in HIRSP if, during the nine months prior to the application, they received and submitted with their application, any of the following, based wholly or partially on medical underwriting considerations:

- Notice of rejection or cancellation of coverage from one or more health insurers.
- Notice of reduction or limitation in

coverage, including restrictive riders, from an insurer if the effect of the reduction is to substantially reduce coverage compared to the coverage available to a person considered a standard risk for the type of coverage provided by the plan.

- Notice of an increase in premium of 50% or more for a current policy, unless the increase is applicable to all of the insurer's health insurance policies then in effect.
- Notice of a premium for a prospective policy from two or more insurers that is 50% or more in excess of the premium that would be paid by persons considered a standard risk for similar coverage.

Receipt of any of the above notices from a person who is an insurance intermediary (that is, an insurance broker or agent acting only on his or her authority) is not sufficient to qualify an individual for participation in the plan. Further, the administering carrier may not certify a person as eligible for the plan without actual receipt of one or more of the appropriate qualifying notices.

Eligibility as a Result of Certain Specified Diseases or Disabilities. Individuals under the age of 65 may also be eligible for coverage under HIRSP without having received any of the notices described above if they have certain specific diseases or disabilities. Persons may enroll in HIRSP if they submit evidence of:

- A positive test for the human immunodeficiency virus (HIV) or an antibody to HIV.

- Coverage under Medicare because of a disability, defined as a condition which causes the individual to be unable to perform substantial, gainful activity because of a physical or mental impairment which will last at least 12 months.

Other Persons Eligible for HIRSP. Persons who meet the definition of an "eligible individual" are also eligible to enroll in HIRSP. An eligible individual is an individual for whom all of the following apply:

- The aggregate of the individual's period of creditable coverage is 18 months or more.

- The individual's most recent period of creditable coverage was under a group health plan, governmental plan, federal governmental plan or church plan, or under any health insurance offered in connection with any of those plans.

- The individual does not have creditable coverage and is not eligible for coverage under a group health plan, part A or part B of Medicare or MA or any successor program.

- The individual's most recent period of creditable coverage was not terminated for any reason related to fraud or intentional misrepresentation of material fact or a failure to pay premiums.

- If the individual was offered the option of continuation coverage under a federal continuation provision, the individual elected the continuation coverage.

- The individual has exhausted the federal continuation coverage.

Creditable coverage means health care coverage under:

- a group health plan;
- health insurance;
- Medicare Part A or B;
- Medicaid;

- Tricare, formerly the Civilian Health and Medical program of the Uniformed Services (CHAMPUS);
- Civilian Health and Medical Program of the Veterans Administration (CHAMPVA);
- an Indian health services or tribal organization health plan;
- a state health benefits risk pool;
- a federal employee health plan;
- a public health plan; or
- a Peace Corps health plan.

In 2001, rejection of health insurance coverage accounted for 57.8% of the approvals for HIRSP coverage.

Persons Ineligible for Participation in HIRSP. Medically uninsurable persons eligible for participation in the plan by virtue of meeting any of the above conditions may still not be able to enroll if they fall under certain specific exclusions enumerated in the statutes. The following categories of persons are ineligible for HIRSP:

- Persons 65 years of age or older, except if the person meets the definition of an eligible individual or the person is a policyholder when turning 65.

- Persons for whom the plan has paid out a total of \$1,000,000 in benefits.

- Persons for whom a premium, deductible or coinsurance amount is paid or reimbursed by a federal, state, county, or municipal government. However, this provision does not apply for deductibles or coinsurance amounts paid from public funds for vocational rehabilitation, for the treatment of renal disease, hemophilia or cystic fibrosis, for HIV/AIDS related insurance continuation, or for maternal and child health services. In addition, this provision does not apply to health insurance premium subsidies for HIV infected persons.

- For 12 months following termination,

persons who have voluntarily ended coverage under the plan. This ineligibility provision applies to persons who terminate HIRSP coverage as a result of nonpayment of premiums. It does not apply where a person has terminated coverage because he or she began receiving or became eligible to receive medical assistance benefits.

- Persons eligible for creditable coverage provided by an employer on a self-insured basis or through health insurance, except policies that are considered supplemental insurance or policies where medical care coverage is secondary or incidental to other insurance benefits such as liability or worker's compensation insurance or policies where coverage is for a specific type of care or illness, such as long-term care, dental, or vision services.

- Persons eligible for medical assistance.

HIRSP Benefits

HIRSP offers two types of plans. Both plans provide coverage for major medical expenses. Plan 1 is for individuals who meet the eligibility criteria above, but are not eligible for Medicare. Plan 2 is for individuals who meet the eligibility criteria above and are eligible for Medicare. Coverage for Plan 2 is limited to those benefits not paid by Medicare Part A or B, regardless of whether or not the enrollee is enrolled in Part B.

All HIRSP enrollees are required to obtain HIRSP-covered services from medical assistance (MA) certified providers.

Tables 1A and 1B provide a summary of covered expenses and excluded expenses, respectively, under HIRSP.

Table 1A: Covered Expenses Under HIRSP

- Hospital services
- Basic medical/surgical services (including inpatient and outpatient medical and surgical, diagnostic, anesthesia and consultation services)
 - Inpatient treatment for up to 30 days per calendar year for alcoholism and drug abuse and up to 60 days per calendar year for mental and nervous disorders
 - Some outpatient services for alcoholism, drug abuse and mental and nervous disorders (including services in a community support program for the chronically mentally ill), up to the maximum allowed per calendar year
- Prescription drugs and insulin
- Physical therapy, occupational therapy and speech and language pathology
- Up to 40 home health care visits each calendar year (up to 365 visits for persons on Medicare when combined with Medicare benefits)
- Processing charges for blood
- Use of radium and other radioactive materials
- Diagnostic x-rays and laboratory tests
- Oxygen
- Anesthesia
- Durable medical equipment other than hearing aids
- Prostheses (other than dental)
- Disposable medical supplies
- Ambulance services
- Up to 30 days of skilled nursing care for persons each period of confinement (up to 120 days in one calendar year for persons on Medicare)
 - Services and supplies for treatment of diabetes, including outpatient self-management education programs
- Chiropractic services
- Limited medically necessary treatments for correction of temporomandibular disorders
- Some oral surgery procedures
- Limited dental care
- Papanicolaou (Pap) tests, pelvic exams and associated laboratory fees when a physician or a nurse practitioner performs the test or examination
- Routine mammography for women age 45 or over
- Breast reconstruction of the affected tissue incident to a mastectomy
- Initial purchase or eyeglasses or contact lenses for aphakia and keratoconus, and initial purchase following cataract surgery
- Blood lead tests for policyholders under six years of age
- Maternity and newborn services
- Hospice care provided by a licensed hospice provider

Standard Plan Features. HIRSP contains a number of cost sharing and benefit limitation provisions which are common to traditional health insurance policies, including medical deductibles, medical and prescription drug coinsurance, limits on out-of-pocket costs, waiting periods for pre-existing conditions, and lifetime maximum benefit limitations. These are described below.

Deductibles. Deductibles are specified amounts of covered services which the enrollee must personally pay during a coverage period before actual insurance benefits will be available. Deductibles are typically used to discourage the casual use of medical services and to help control program costs by reducing first dollar coverage.

Plan 1 offers two medical deductible options to enrollees. Option A has a \$1,000 medical deductible for enrollees with income of \$20,000 or more. The medical deductible is less for enrollees with incomes at or below \$20,000. Option B has a \$2,500 medical deductible for all enrollees. Enrollees choosing Option B pay lower premiums than those choosing Option A. The medical deductible for Plan 2 is equal to the medical deductible required under Medicare, currently \$500.

Expenses used to satisfy the medical deductible during the last 90 days in a calendar year are also applied to satisfy the medical deductible for the following calendar year.

Coinsurance. Coinsurance is the fixed percentage or amount of covered medical expenses which an enrollee must personally pay during a coverage period after satisfying the deductible requirements. The combined deductible and coinsurance maximums usually constitute the out-of-pocket medical expense payment limit for the enrollee during a coverage period.

Current law specifies that if major medical expenses exceed the required medical deductible amount, the plan must pay at least 80% of any ad-

Table 1B: Excluded Expenses Under HIRSP

- Routine physical examinations and related services
- Experimental treatments, as determined by DHFS
- Cosmetic treatment other than surgery for the repair or treatment of an injury or a congenital bodily defect or breast reconstruction of the affected tissue incident to a mastectomy
- Custodial or domiciliary care not eligible under Medicare
- Private hospital room if not medically necessary
- Dental care (except certain surgical procedures)
- Eyeglasses (except as noted in Table 1A) and hearing aids
- Services of blood donors and replacement fees for the first three pints of blood provided to an eligible person
- Services or drugs for the treatment of infertility, impotence or sterility
- Charges and fees in excess of usual and customary charges
- Charges for care which is not medically necessary
- Personal services and supplies provided by a hospital or nursing home or any other nonmedical or nonprescription service or supply
- Services or supplies not within the scope of the authorized practice of the individual or institution providing them
- Expenses incurred before the effective date of coverage or after coverage ends
- Injuries or illness as a result of acts of war
- Expenses for which benefits are payable under other insurance policies or by government programs

ditional costs covered by the plan. However, for enrollees covered under Plan 1A, total out-of-pocket expenses during a calendar year, including medical deductibles, medical copayments and medical coinsurance provisions are limited to \$2,000 for an individual or \$4,000 for a family with more than one HIRSP enrollee. For enrollees in Plan 1B, total out-of-pocket expenses for a calendar year are limited to \$3,500 for an individual or \$7,000 for a family with more than one HIRSP enrollee. Under Plan 2, out-of-pocket expenses are limited to \$500 per person enrolled in Medicare, including the medical deductible. Once the out-of-pocket limits are reached, HIRSP pays 100% of covered expenses.

Additionally, DHFS is authorized to establish, by rule, copayments, coinsurance rates, and copayment and coinsurance out-of-pocket limits over which the plan will pay 100% of covered costs for prescription drug coverage. Establishment of the copayment amounts, the coinsurance rates, and the out-of-pocket limits is subject to the approval of the HIRSP Board.

Currently, enrollees pay HIRSP prescription drug coinsurance of 20% up to a maximum of \$25 per prescription. However, for enrollees covered under Plan 1A, prescription drug coinsurance out-of-pocket maximums range from \$375 to \$750, based upon income levels. Plan 1B enrollees have a prescription drug coinsurance out-of-pocket maximum of \$1,000. Plan 2 enrollees have a prescription drug coinsurance out-of-pocket maximum of \$125. Once the out-of-pocket limits are reached, HIRSP pays 100% of covered prescription drug expenses for the remainder of the calendar year.

Table 2A illustrates how the current medical deductible and medical coinsurance payment mechanisms would operate for HIRSP enrollees under Plan 1A and 1B with different medical expense scenarios. Under these scenarios, it is assumed that only one family member is enrolled in HIRSP.

Under the first example, after applying the \$1,000 medical deductible, the HIRSP Plan 1A enrollee is responsible for paying 20% of the next \$950 of expenses, or \$190. The plan pays the \$760 balance.

Under the second example, after applying the \$2,500 medical deductible, the enrollee would be responsible for paying 20% of the next \$5,000 (or \$1,000) of any additional covered expenses incurred during the calendar year before the plan would begin paying 100% of all additional covered medical expenses. This individual is limited to \$3,500 in out-of-pocket expenses (\$2,500 medical deductible and \$1,000 coinsurance).

Table 2B illustrates how the current prescription drug coinsurance payments operate separately from the medical expense deductibles and coinsurance payments. The same assumptions from Table 2A apply.

Under the first example, the HIRSP Plan 1A enrollee would be responsible for paying 20% of the \$4,000 in prescription drug costs, which equals \$800. However, for the enrollee's income level, there is an out-of-pocket maximum of \$750. Therefore, the enrollee is responsible for paying only \$750 of the \$4,000 prescription drug expense.

Under the second example, the HIRSP Plan 1B enrollee is responsible for paying 20% of the \$4,000, which equals \$800. Since the Plan 1B enrollee has an out-of-pocket maximum of \$1,000, the HIRSP Plan 1B enrollee is responsible for the entire \$800 amount.

Waiting Periods. Waiting periods are the times during which preexisting conditions diagnosed before the policy was issued will not be covered. Waiting periods for preexisting conditions are used as an underwriting tool to prevent individuals from purchasing insurance only when they have a need to seek medical treatment.

The statutes provide that conditions that are diagnosed or treated in the six months preceding the filing of an application are not covered for the first six months that the individual is enrolled in HIRSP, except for certain individuals. If an individual has been treated or diagnosed for a particular condition at any time during the six months before the administering carrier receives the person's application for enrollment, HIRSP will not pay any claims for expenses arising from this condition during the first six months of HIRSP coverage. Health care services provided for the condition will be covered after the six-month waiting period.

Table 2A: HIRSP Plan 1 – Examples of Payments Under Medical Expense Scenarios

	Covered Expenses Balance	Enrollee Payments	HIRSP Payments
Plan 1A			
Total Covered Medical Expenses	\$1,950		
Less Enrollee Payments of \$1,000 Deductible	<u>-1,000</u>	\$1,000	
Expense Remaining After Deductible Payment	950		
Less 20% Enrollee Coinsurance [Based on \$950]	<u>-190</u>	190	
Expense Remaining After Coinsurance	760		
Less 80% HIRSP Payment [Based on \$950]	<u>-760</u>		<u>\$760</u>
Total	\$0	\$1,190	\$760
Plan 1B			
Total Covered Medical Expenses	\$13,500		
Less Enrollee Payments of \$2,500 Deductible	<u>-2,500</u>	\$2,500	
Expense Remaining After Deductible Payment	11,000		
Less 20% Enrollee Coinsurance [Based on next \$5,000]	<u>-1,000</u>	1,000	
Less 80% HIRSP Payment [Based on next \$5,000]	<u>-4,000</u>		\$4,000
Expense Remaining After 80/20 Coinsurance	6,000		
Less 100% HIRSP Payment on Balance	<u>-6,000</u>		<u>6,000</u>
Total	\$0	\$3,500	\$10,000

Table 2B: HIRSP Plan 1 – Table 2A Examples with Prescription Drug Expenses

	Covered Expenses Balance	Enrollee Payments	HIRSP Payments
Plan 1A			
Total Covered Prescription Drug Expenses	\$4,000		
Less 20% Enrollee Coinsurance (up to \$750 max.)	<u>-750</u>	\$750	
Expense Remaining After Coinsurance	3,250		
Less 100% HIRSP Payment on Balance	<u>-3,250</u>		<u>\$3,250</u>
Total For Prescription Drug Expenses	\$0	\$750	\$3,250
Total For Medical Expenses (from Table 2A)	<u>\$0</u>	<u>\$1,190</u>	<u>\$760</u>
Total For Medical and Drug Expenses Combined	\$0	\$1,940	\$4,010
Plan 1B			
Total Covered Prescription Drug Expenses	\$4,000		
Less 20% Enrollee Coinsurance (up to \$1,000 max.)	<u>-800</u>	\$800	
Expense Remaining After Coinsurance	3,200		
Less 100% HIRSP Payment on Balance	<u>-3,200</u>		<u>\$3,200</u>
Total For Prescription Drug Expenses	\$0	\$800	\$3,200
Total For Medical Expenses (from Table 2A)	<u>\$0</u>	<u>\$3,500</u>	<u>\$10,000</u>
Total for Medical and Drug Expenses Combined	\$0	\$4,300	\$13,200

Eligible individuals are exempt from the six-month waiting period. Additionally, individuals eligible for Medicare Part A or B are exempt from the six-month waiting period if they meet all of the other criteria of an "eligible individual."

Lifetime Benefit Limits. A lifetime benefit limit is the maximum amount of medical benefits that may be received under the plan during the enrollee's lifetime. Overall benefit payment maximums are used to provide a degree of protection to insurance plans from catastrophic losses. Currently, HIRSP policyholders are subject to a \$1 million lifetime limit on benefits for all medical conditions.

Cost Containment Procedures. Persons receiving services under HIRSP are subject to certain cost containment procedures to control medical costs.

Prior Authorization. Under current law, DHFS is authorized to implement, by administrative rule, the same utilization and cost control procedures used under the MA program. While MA requires prior authorization for certain services, HIRSP does not require prior authorization. Instead, DHFS encourages providers to obtain prior authorization before certain services are provided.

ClaimCheck. ClaimCheck is software used in the HIRSP processing system that identifies and corrects claims payments for inappropriate procedure codes billed on HIRSP claims.

Insurance Disclosure. Health insurers are required to disclose information on the Wisconsin residents they insure for the purpose of post-payment recovery (when health insurance is retroactively identified for a HIRSP policyholder) and cost avoidance (when other health insurance is available and a provider tries to bill HIRSP prior to billing other health insurance).

Subrogation. Subrogation is recovery of monies from third parties for HIRSP policyholders who have suffered injuries for which third parties may be liable for the costs of medical services associated

with the injury. Third parties could include worker's compensation and medical malpractice policies.

Prescriptions. The Board adopted the goals of increasing generic prescriptions, therapy management programs, and benefit education to contain prescription costs. The Board also adopted two drug utilization review strategies. The first, dose optimization, attempts to save costs by issuing certain drugs at a double dose if the cost is less than double that of the original dose. The second, step-care processing, attempts to save costs by recommending that physicians initially prescribe a cheaper, first-line product. For example, the pharmacist will intervene by calling the doctor to recommend a trial of Lovastatin for a patient who was prescribed Zocor, a second-line product, unless a first-line product had already been tried.

HIRSP Funding

There are four sources of funding used to support HIRSP: (1) state general purpose revenues (GPR); (2) premiums paid by participants; (3) assessments on health insurance companies doing business in Wisconsin; and (4) a pro rata reduction in the billed charges of health care providers. Table 3 provides the amount from each funding source used to support HIRSP in 2001-02.

Table 3: HIRSP Funding (2001-02)

Funding Source	Funding Amount	% of Total (less GPR)
GPR	\$10,000,000	0.0%
Premiums	44,436,265	60.0
Insurer Assessments	14,812,088	20.0
Provider Contributions	<u>14,812,088</u>	<u>20.0</u>
Total	\$84,060,441	100.0%

State General Purpose Revenue. DHFS was provided \$10 million GPR in 2001-02 and \$9.5 million GPR in 2002-03 to offset total HIRSP program costs.

Participant Premiums. After subtracting the GPR funding from total plan costs, current law requires that 60% of the remaining projected operating and administrative costs of the program be funded from premium revenue.

However, HIRSP Plan 1 premium rates cannot be less than 140% to 150% of the rate that would be charged under an individual policy providing substantially the same coverage and deductibles as HIRSP. The Board is required to approve the premiums.

If setting Plan 1 rates at 140% to 150% of the standard rate is not sufficient to cover 60% of plan costs, then DHFS, with the approval of the Board, has three options. First, any excess revenue premium revenue available from previous years can be used to fund any difference. Second, if the excess revenue is not sufficient to fund the difference between premium revenue and 60% of plan costs, then Plan 1 premiums can be increased above 140% to 150% of the standard rate, but no more than 200% of that rate. Third, if the projected premium revenue would not be sufficient to fund 60% of plan costs after exercising the first two options, then contributions from insurers and providers can be increased to fund the remainder of costs.

Plan 2 rates are to be based on three factors:

- a comparison between the average per capita amount of covered expenses paid by HIRSP in the previous calendar year on behalf of Plan 2 enrollees and the average per capita amount of covered expenses paid by HIRSP in the previous calendar year on behalf of Plan 1 enrollees;

- the enrollment levels of enrollees with coverage under Plan 2; and

- other economic factors DHFS and the Board consider relevant.

As of July 1, 2002, Plan 1 premium rates were established at an amount equal to 150% of the standard rate. Plan 2 rates were approximately 73% of Plan 1A rates. The actual rate paid by an enrollee will differ based on the zip code in which he or she resides. The state's zip codes are divided into three zones. These zones include the Milwaukee area, the Madison area and southeastern Wisconsin, and the rest of the state. Table 4 identifies the premium rates effective July 1, 2002, for each of the three zones.

Table 5 illustrates how HIRSP Plan 1A premiums for one group, females ages 50 through 54 residing in Zone 1, have changed during the past 15 years.

Assessments on Insurers. Current law requires that 20% of HIRSP operating and administrative costs (after accounting for the GPR funding) be paid from insurer assessments. Every participating insurer must share in the costs of the plan in proportion to the ratio of the insurer's total health care coverage revenue for state residents during the preceding calendar year to the aggregate health care coverage revenue of all participating insurers for state residents during the preceding calendar year.

The statutes provide that "[e]very insurer shall participate in the cost of administering the plan." On its face, this provision appears to make all insurers writing health insurance in Wisconsin subject to the assessment, and initially this was the approach taken by the Commissioner of Insurance when the first assessment was levied in 1981.

This assessment was immediately challenged by a private employer offering a self-insurance health plan on the grounds that the federal Employee Retirement Income Security Act prohibited state regulation of self-insured plans. It was argued that self-insured plans could not be subject to assessment in order to subsidize the operations of HIRSP. In

Table 4: HIRSP Annual Premium Rates (effective 7/1/02)

Zone 1: Certain zip codes in the Milwaukee area.
 Zone 2: Certain zip codes in the Madison area and southeast Wisconsin.
 Zone 3: The remainder of the rest of state.

General Split Corp. v. Mitchell (523 Federal Supplement 427, Eastern District of Wisconsin, 1981), the Court upheld the challenge and ruled that self-insured plans were not subject to Wisconsin insurance laws. Thus, HIRSP deficits could not be charged against self-insured plans. As a result of this ruling, only private insurance companies are subject to assessment to support HIRSP.

For the July 1, 2002 through December 31, 2002 period, 268 private health insurance companies doing business in the state paid an assessment. The amount of the assessment for the period July, 2002, through December, 2002, ranged from \$2.10 to \$1,303,196.77 per insurer.

Unreimbursed Health Care Provider Charges. Current law requires that DHFS reimburse HIRSP providers for covered services at a rate equal to the medical assistance (MA) reimbursement rate paid to providers, plus an enhancement determined by

DHFS. Currently, the enhancement is equal to 37.2% of the MA reimbursement rate. With this enhancement, providers would be paid, on average, an amount equivalent to approximately 59% of a provider's usual and customary charges. However, current law specifies that pharmacy costs are paid at the standard MA rate and are not subject to the enhancement. This enhancement does not apply to inpatient and outpatient hospital claims or Medicare crossover claims.

Further, current law requires that HIRSP providers fund 20% of the HIRSP costs that remain after the GPR supplement is subtracted from total plan costs. The providers' contribution is collected by reducing reimbursements by an amount that would total 20% of projected plan costs. Except for copayments, coinsurance, or deductibles required or authorized under the plan, providers are expressly prohibited from billing the HIRSP enrollee for any of the unreimbursed amount.

Table 5: Example of Annual HIRSP Premium (Plan 1A) -- Female Age 50 through 54* (1988-89 through 2002-03)

Year	Rate
1988-89	\$1,540
1989-90	1,540

Premium and Deductible Subsidy Program. Currently, individuals with less than \$25,000 in annual household income are eligible for a subsidy to cover a portion of their premium if enrolled in Plan 1A or Plan 2. Individuals with annual income less than \$20,000 are eligible for a subsidy to cover a portion of their deductible if enrolled in Plan 1A. Enrollees in Plan 2 are not eligible for a deductible subsidy. Enrollees in Plan 1B are not eligible for premium or deductible subsidies.

In 2002-03, premium and deductible subsidies are expected to total approximately \$4.4 million. Of this amount, \$741,800 GPR is available to fund a portion of this cost. The remainder will be funded equally from assessments on health insurers and reduced provider payments.

Table 6 identifies the current annual household income eligibility levels for the premium and deductible subsidy program for Plan 1A and the amount of the subsidies at each income level. Table 7 compares the growth in the number of HIRSP enrollees for Plans 1A and 2 and the number of premium and deductible subsidy program partici-

Table 6: HIRSP Plan 1A Premium and Deductible Subsidies Levels

Annual Household Income Level		Amount of Premium as % of Standard Risk	Deductible Amount
At Least	But Less Than		
\$0	\$10,000	100.0%	\$500
10,000	14,000	106.5	600
14,000	17,000	115.5	700
17,000	20,000	124.5	800
20,000	25,000	130.0	1,000

Table 7: HIRSP Plan 1A and 2 Enrollees and Subsidy Participants (as of June 30 of Each Year)

Year	HIRSP Enrollees Number	Subsidy Enrollees	
		Number	% of Total Enrollees
1996	8,934	3,411	38.2%
1997	7,667	3,267	42.6
1998	7,218	2,862	39.7
1999	6,771	2,598	38.4
2000	7,257	2,808	38.7
2001	8,611	3,319	38.5
2002	10,005	3,687	36.9

pants for the years 1996 through 2002. HIRSP enrollees for Plan 1B are not included in the table since these enrollees are not eligible for premium or deductible subsidies.

Organization and Management of HIRSP

Board of Governors. The plan has a 13-member Board of Governors. The Board consists of the DHFS Secretary (or a designee from DHFS), who serves as chair, the Commissioner of Insurance (or a designee from OCI) and the following 11 members appointed by the Secretary of DHFS to staggered, three-year terms: two participating insurers representing nonprofit organizations, two other

participating insurers, three health care providers, and four public members. Of the four public members, at least one must have coverage under HIRSP, and one must be a representative of a small business in the state. Further, none of the public members may be professionally affiliated with the practice of medicine, a hospital, or an insurer. Finally, the three health care provider representatives include one representative of the State Medical Society, one representative of the Wisconsin Hospital Association, and one representative of an integrated multi-disciplinary health system.

The Board's statutory duties and responsibilities include: (1) collecting assessments from all insurers to provide for claims paid under the plan and for administrative expenses incurred or estimated to be incurred during the assessment period; (2) developing and implementing a program to publicize the existence of the plan, the eligibility requirements and procedures for enrollment and to maintain public awareness of the plan; (3) establishing procedures under which applicants and participants may have grievances reviewed by an impartial body and reported to the Board; (4) advising the Department on the choice of coverage; (5) establishing oversight committees to address various administrative issues, such as financial management of the plan and performance standards for the plan administrator; (6) reporting to the appropriate legislative standing committees and to members of the plan summarizing the activities of the plan in the preceding calendar year and in the report, defining the cost burden imposed by the plan on all policyholders in the state; (7) submitting a report annually to the Legislature and Governor on the operation of the plan, including any recommendations to change the plan; and (8) approving the program budget prepared by DHFS before its implementation.

Current law authorizes the Board to prepare and distribute eligibility and enrollment forms to insurance solicitors, agents and brokers, and the general public. The Board is further authorized to provide for the reinsurance of risks incurred by the

plan and may enter into reinsurance agreements with insurers to establish a reinsurance plan for risks of coverage described in the plan or obtain commercial reinsurance to reduce the risk of loss through HIRSP. By administrative rule, the Board may provide for agent commissions. The statutes require agents and insurers to provide assistance in filing applications. DHFS is authorized to establish any additional powers and duties of the Board by administrative rule.

Plan Administrator. Current law requires the HIRSP plan administrator to: (1) perform all eligibility and administrative claims payment functions relating to the plan; (2) establish premium billing procedures for collection of premiums from insured persons; (3) perform all necessary functions to assure timely payment of benefits to persons covered under the plan, including making information available relating to the proper manner of submitting a claim and distribution of claim submission forms, evaluating the eligibility of each claim for payment under the plan and notifying each claimant within 30 days after receiving a properly completed and executed proof of loss whether the claim is accepted, rejected or compromised; (4) under the direction of DHFS, pay claims expenses from the premium payments received from or on behalf of persons covered under the plan. If the plan administrator's payments for claims expenses exceeds premium payments, the Board of Governors must forward to DHFS, and DHFS must provide to the plan administrator, additional funds for payment of claims expenses.

The plan administrator is paid for its direct and indirect costs from the health insurance risk-sharing fund. Allowable expenses include that portion of the administrator's costs for printing, claims administration, customer service, financial and operational reporting, building overhead costs and other actual operating and administrative expenses. The plan administrator is required to account for HIRSP administrative costs separately from all costs related to the administration of the

medical assistance (MA) program. DHFS currently pays the plan administrator approximately \$258,500 monthly for HIRSP administrative costs.

Current law requires that the HIRSP plan administrator be the state's MA fiscal agent. Electronic Data Systems (EDS), the state's current MA fiscal agent, has been the plan administrator for HIRSP since July 1, 1998. However, DHFS must obtain the approval of the Board of Governors before implementing any contract with the plan administrator.

In addition to contracting with the plan administrator for administrative services, DHFS contracts with the Legislative Audit Bureau to conduct annual financial audits of HIRSP.

Oversight by DHFS. The Secretary of DHFS, in addition to chairing the HIRSP Board of Governors, has a number of responsibilities relating to the operation of the plan. The statutes require the Secretary to promulgate a variety of administrative rules governing the operation of HIRSP, including rules to: (1) operate the plan; (2) establish annual HIRSP premium rates, insurers' assessments, and provider payment rates; (3) adjust premiums, insurers' assessments, and provider payment rates as necessary to meet the costs of the plan; and (4) permit certain persons who receive government reimbursements or copayments to continue to be eligible for the plan. DHFS may also promulgate rules relating to premium rates, insurer assessments, and provider payment adjustments as emergency rules.

DHFS may establish the following limits on covered services by promulgating administrative rules to:

- apply the same utilization and cost control procedures that apply under rules established for MA, except that DHFS cannot apply the same

copayments to HIRSP plan participants as apply to MA recipients;

- limit the amount of services provided to individuals with chronic mental illness in community support programs; and
- establish copayments, coinsurance, and out-of pocket limits for prescription drugs, subject to the approval of the Board of Governors.

Further, DHFS may limit coverage of prescription drugs to only those claims submitted by pharmacists directly to the plan administrator.

Finally, DHFS, in consultation with the Board, is required to establish a program budget for each plan year. DHFS may not implement the budget unless approved by the Board.

In 2002-03, DHFS was budgeted approximately \$4.9 million in segregated revenue for administration of HIRSP.

Oversight by OCI. Under current law, OCI is required to assess each insurer its proportional share of the HIRSP costs to be paid by insurers as determined by DHFS. OCI is required to calculate each insurer's proportion and to notify DHFS of the insurers that are to share in the costs. OCI may, by rule, exempt as a class, those insurers whose share would be so minimal as to not exceed the estimated cost of levying the assessment.

OCI may, by rule, require insurers to submit information that is necessary for OCI, DHFS, and the Board of Governors to carry out their responsibilities related to the administration of HIRSP.

However, DHFS, with the agreement of OCI, may perform the various administrative functions related to the assessment of insurers.

Participation Levels, Claims Activity and Utilization Summary

Plan Enrollments. Enrollment in HIRSP increased from 7,240 in July, 1998, to 15,449 in October, 2002. Some of the increase since 1997 is due to the creation of Plan 1B in 1998 to comply with the federal Health Insurance Portability, Accountability and Access Act of 1996 (HIPAA). The number of restated policies in force for Plan 1B as of October 31, 2002, was 5,145. According to DHFS, some of the increase in enrollment may also be due to the increasing number of insurers that are no longer providing coverage to small businesses.

As of October, 2002, 56% of HIRSP participants were enrolled in Plan 1A and 56% of HIRSP enrollees were female.

Length of HIRSP Participation in Plan. Relatively few HIRSP enrollees are long-term participants. For participants that cancelled their HIRSP coverage in 2001, the average period of enrollment was two years and eight months for Plan 1A, one year and seven months for Plan 1B, and four years and five months for Plan 2. The average period of enrollment for all plans combined was two years and seven months.

Participant Claims Data. Many HIRSP policyholders do not have benefits paid on their behalf. In calendar year 2001, 51% of HIRSP policyholders did not meet their deductible requirement and therefore, did not have any benefits paid on their behalf. This amount varies significantly between the HIRSP plans. For individuals enrolled in Plan 1A (which has a \$1,000 deductible), 47% did not meet the deductible requirement. For individuals enrolled in Plan 1B (which has a \$2,500 deductible), 85% did

Table 8: HIRSP Enrollment as of October, 2002

Plan	Number of HIRSP Enrollees
Plan 1A	8,580
Plan 1B	5,145
Plan 2	<u>1,724</u>
Total	15,449

not meet the deductible requirement. For individuals enrolled in Plan 2, which has the lowest deductible (\$500), 13% did not meet the deductible requirement.

According to unaudited financial reports, benefit costs for HIRSP totaled \$80.3 million in 2001-02. These costs consisted of approximately \$65.2 million in claims paid after accounting for rebates, GPR funded deductible subsidies, and refunds. An additional \$15.1 million was funded by provider reductions.

Utilization Summary. For calendar year 2001, 63% of total HIRSP claims were paid for either pharmaceuticals or inpatient hospital services. Table 9 identifies HIRSP claims activity for calendar year 2001 by service type.

Over 70% of total HIRSP costs were paid on behalf of policyholders in Plan 1A. This is not surprising, because approximately 56% of all HIRSP policyholders are enrolled in Plan 1A. However, expenditures for pharmaceuticals were shared almost equally between Plan 1A and Plan 2. The reason such a significant portion of Plan 2 costs are attributable to pharmaceuticals is because Medicare does not cover outpatient pharmaceuticals.

Table 9: HIRSP Claims -- Calendar Year 2001

	<u>Plan 1, Option A</u>		<u>Plan 1, Option B</u>		<u>Plan 2</u>		<u>Total</u>	
	Expenditures	% of Total	Expenditures	% of Total	Expenditures	% of Total	Expenditures	% of Total
Inpatient Hospital	\$16,202,580	39%	\$3,152,196	52%	\$663,767	6%	\$20,018,543	34%
Pharmaceuticals	8,466,019	21	421,185	7	8,131,383	71	17,018,587	29
Physician	8,813,992	21	1,270,630	21	1,165,538	10	11,250,160	19
Outpatient Hospital	6,818,460	17	1,120,613	18	1,150,201	10	9,089,274	16
Durable Med. Equipment	978,174	2	109,252	2	244,804	2	1,332,230	2
Nursing Home	41,280	0	7,374	0	66,341	1	114,995	0
Totals	\$41,320,505	100%	\$6,081,250	100%	\$11,422,034	100%	\$58,823,789	100%

Expenditures for Plan 1B are lower due, in part to a higher deductible (\$2,500 compared with \$1,000 for Plan 1A). Plan 1B is an alternative for individuals that are less certain they will incur high medical expenses. For individuals more certain that they will incur high medical expenses during the plan year, Plan 1A is more likely to be an appealing option, despite its higher premiums.

Case Management Pilot Program. The pilot program will last three years and may include up to 300 enrollees. Participation in the program is voluntary. Each enrollee must satisfy any of the following criteria:

- Enrollee was diagnosed with a chronic disease.
- Enrollee takes two or more prescribed medications on a regular basis.
- Enrollee was treated at least twice in a hospital emergency room, or admitted at least twice to a hospital as an inpatient, within six months of applying for the pilot.

A team provides the community-based case management services. The team consists of a nurse case manager, a pharmacist, a social worker, and the primary care physician. The services provided include initial intake assessment, development of a treatment plan, coordination of health care services, patient education, family support, and monitoring and reporting of patient outcomes and costs.

The service provider must:

- be a private, nonprofit, integrated health care system that provides access to health care in a medically underserved area or in a health professional shortage area;

Summary of Recent Changes

In 2001, the Board approved the conversion from cash to accrual accounting. The Legislative Audit Bureau recommended this change in its audit reports for state fiscal years 1999 and 2000. The accrual method of accounting recognizes liabilities when incurred to ensure sufficient reserves if HIRSP enrollment suddenly and significantly declined. Cash accounting ignores liabilities until they are paid.

2001 Wisconsin Act 16 and 2001 Wisconsin Act 109 included a number of changes to HIRSP. The major changes include implementation of a 20% prescription drug coinsurance rate, with out-of-pocket limits, and the establishment of a community-based case management services demonstration pilot.

- operate an existing community-based case management program with demonstrated successful client and program outcomes; and
- demonstrate an ability to assemble and coordinate an interdisciplinary team of health care professionals.

DHFS must conduct a study to evaluate the pilot program in terms of health care outcomes and cost avoidance. DHFS will submit a report on the results of the study to the Legislature and to the Governor.

DHFS received proposals from two service providers. The pilot is scheduled to begin January 1, 2003, after DHFS selects which provider will participate in the pilot.
