2023 Senate Bill 906

Senate Amendment 1

2023 SENATE BILL 906

Under **current law**, the Department of Natural Resources (DNR) is directed to carry out various efforts relating to solid waste management. These efforts include a statewide education program to provide information and training relating to solid waste management, as well as certain grant programs to support recycling activities.

2023 Senate Bill 906 directs DNR to create and administer **two grant programs relating to rechargeable battery recycling**. One grant program must provide funding to expand rechargeable battery recycling and recovery programs, while the other must provide funding to solid waste facilities and materials recovery facilities for the purpose of installing, upgrading, or expanding fire detection and suppression systems.¹

In addition to the above, the bill expands DNR's duties relating to solid waste education, directing the department to inform the public about the dangers of rechargeable batteries in the waste and recycling stream, and about existing options for proper recycling of such batteries. The bill also expands the scope of an existing appropriation relating to recycling administration, allowing this appropriation to be used for DNR's statewide education program.

SENATE AMENDMENT 1

Senate Amendment 1 clarifies and expands the definition for "rechargeable battery" for the purposes of the bill's grant programs. Under the amendment, "rechargeable battery" is defined to include batteries designed for single use, such as a lithium-primary battery. Under the bill, as introduced, the definition only included batteries that were designed to be recharged, including lithium-ion batteries.

BILL HISTORY

Senate Amendment 1 was introduced on January 29, 2024, by Senator Tomczyk. On February 8, 2024, the Senate Committee on Natural Resources and Energy voted to recommend adoption of the amendment by a vote of Ayes, 5; Noes, 0; and passage of the bill, as amended, by a vote of Ayes, 5; Noes, 0.

¹ The bill does not appropriate funds for the purposes of the grant programs. However, the bill directs DNR to submit a request to the Joint Committee on Finance to provide supplemental funding from the environmental fund for the purposes of providing grants under the bill. The bill also requires the department to submit a similar request for sufficient funds to support the department's new educational duties relating to rechargeable batteries.
