Analysis Prepared by the Department of Workforce Development

Statutory authority: Section 49.155 (1d), Stats., as affected by 2005 Wisconsin Act 165; and s. 227.11, Stats.

Statutes interpreted: Sections 48.651 and 48.685, Stats.; Sections 49.155 (1d) and 253.15 (4), Stats., as affected by 2005 Wisconsin Act 165; Section 347.48 (4), Stats., as affected by 2005 Wisconsin Act 106

Related statutes and rules: Section 48.65, Stats, and Chapters HFS 45, 46, and 55

Explanation of agency authority. Section 49.155 (1d), Stats., provides that the department shall promulgate rules establishing standards for the certification of child care providers under s. 48.651, Stats. The department shall consult with the Child Abuse and Neglect Prevention Board before promulgating those rules. In establishing the requirements for certification of a child care provider, the department shall include a requirement that all providers and all employees and volunteers of a provider who provide care and supervision for children receive, before the date on which the provider is certified or the employment or volunteer work commences, whichever is applicable, training in the most current medically accepted methods of preventing sudden infant death syndrome, if the provider, employee, or volunteer provides care and supervision for children under one year of age, and the training relating to shaken baby syndrome and impacted babies required under s. 253.15 (4), Stats., if the provider, employee, or volunteer provides care and supervision for children under 5 years of age.

In establishing the requirements for certification as a Level II certified family child care provider, the department may not include any other requirement for training for providers.

Section 48.651, Stats., provides that each county department shall certify, according to the standards adopted by the Department of Workforce Development under s. 49.155 (1d), each child care provider reimbursed for child care services provided to families determined eligible under s. 49.155, unless the provider is a child care center licensed by the Department of Health and Family Services under s. 48.65, Stats., or is established or contracted for by a school board under s. 120.13 (14), Stats. The county shall certify two categories of child care providers: Level I and Level II.

Summary of the proposed rules. The proposed rules make the following changes:

Shaken baby syndrome

The proposed rules implement the requirements of 2005 Wisconsin Act 165, relating to training to prevent shaken baby syndrome. The proposed rules require county and tribal agencies provide information on shaken baby syndrome to applicants prior to initial certification. All certified family child care operators, employees, and volunteers who provide care and supervision for children under 5 years of age shall receive department-approved training on shaken baby syndrome and appropriate ways to manage crying or fussing children before the date on which the child care operator is certified or the employment or volunteer work commences.

Restraints for children in motor vehicles

The proposed rules also adopt the changes required by 2005 Wisconsin Act 106 on using booster seats and other restraints for children under 8 years old in motor vehicles used to transport children. If the child is less than one year old or weighs less than 20 pounds, the child shall be properly restrained in a rear-facing individual child care safety seat. If the child is at least 1 year old and weighs at least 20 pounds but less than 4 years old or weighs less than 40 pounds, the child shall be properly restrained in a forward-facing individual child car safety seat. If the child is at least 4 years old but less than 8 years old, weighs at least 40 pounds but not more than 80 pounds, and is not more than 57 inches in height, the child shall be properly

restrained in a shoulder-positioning child booster seat. Children under age 13 years may not ride in the front seat of a vehicle.

Definitions

The proposed rules use the term “certified child care operator” to mean an individual, corporation, partnership, limited liability corporation, non-incorporated association, or cooperative that has legal and financial responsibility for the operation of a child care program and for meeting the requirements under this chapter. A “provider” means a certified child care operator or an employee or volunteer of the child care operator who provides care and supervision for infant, preschool, or school-age children on behalf of the operator.

The proposed rules also use the term “child care” in place of “day care.”

Certification process

- Each county or tribal agency may determine whether to require an applicant to submit references. Under the current rules, the department requires that applicants for certification provide references to the county or tribal agency.
- Under the current rules, within 60 days after receiving a completed application for certification or recertification, a county or tribal agency must either approve the application and issue a certificate or deny the application. Under the proposed rules, the county or tribal agency shall issue a certification to an applicant within 60 days after determining that the applicant is fit and qualified and the applicable standards in ss. DWD 55.08 or 55.09 are in compliance. The rules define “fit and qualified” as displaying the capacity to successfully nurture and care for children, including consideration of abuse of alcohol or drugs, history of a civil or criminal conviction or rule violation that substantially relates to caring for children as described in ch. HFS 12, exercise of unsound judgment, or a history of civil or criminal offenses or any other actions that demonstrate an inability to manage the activities of a child care program. A county or tribal agency may backdate approval to the date that the county or tribal agency received the child care operator’s completed application for certification.
- A county or tribal agency may charge a fee for school-age child care certification not to exceed the licensing fee for a group child care center that provides care and supervision for 9 or more children, plus the costs of required criminal record checks.
- A county or tribal agency shall conduct an inspection of the tract of land on which the home used for child care is located and all buildings and structures on that land, including areas that will not be used for child care.
- A county or tribal agency shall limit certification to one operator for each family residence. This limit is necessary to ensure accurate monitoring of group size and has been departmental policy since 2002.
- A county or tribal agency may require an evaluation and written statement by a physician or licensed mental health professional of any person associated with the care of children or any household resident if the county or tribal agency has reason to believe that the person’s physical or mental health may endanger children in care. The county or tribal agency may deny, suspend, revoke or refuse to renew certification if the evaluation gives the county or tribe reasonable concern that the person’s physical or mental health may endanger children in care.

- The authority for a county or tribal agency to discontinue payment for various violations is repealed from the section on certification denial because it is not an issue of certification. Termination of payment is a subsidy issue that is covered by Chapter DWD 56, relating to the administration of child care funds.
- If a certified family child care operator violates the provisions of this chapter, s. 48.685, Stats, or ch. HFS 12, the county or tribal agency shall require the operator to submit a plan of correction for violation in writing and may forbid the operator to enroll any new children until all violations have been corrected; issue a warning of revocation in writing; or suspend the operator's certification for not more than 60 days. The agency shall either reinstate or revoke the certification by the date that the suspension expires.

Qualifications of child care operators and providers

- A certified child care operator shall demonstrate that he or she is free from tuberculosis test prior to recertification as well as certification.
- The current rule provides that a Level I certified family child care operator shall have completed at least 15 hours of child care training approved by the county or tribal agency responsible for certification. The proposed rule provides that a family child care operator shall have completed at 2 credits of early childhood training or non-credit department-approved training prior to Level I certification.
- Prior to issuing a Level I certification, the county or tribal agency may require that an applicant graduated from high school, obtained a high school equivalency diploma, or obtained a certificate of general education development.
- A substitute who has worked more than 240 hours for a certified family child care operator with a Level I (regular) certification must complete the same early childhood training as the operator. A substitute is a provider who replaces the certified child care operator or staff in a school-age program on a pre-arranged or planned basis.
- The current rule provides that a certified provider shall report immediately to the certifying agency any changes that affect the certified provider's eligibility for certification, including changes in individuals living in the household. The proposed rule provides that a certified child care operator shall report as soon as possible, but no later than the operator's next working day changes that affect eligibility, including the following:
 - Death of a child in care or accident that results in an injury that requires professional medical treatment.
 - Any damage to the premises that may affect compliance with this chapter.
 - Any construction or remodeling of the premises that might have an effect on health and safety of children in care.
 - Convictions, pending charges, or other offenses of the child care operator, household member, or other persons subject to a caregiver background check that could potentially relate to the care of children.
 - Any incident involving law enforcement, including outstanding warrant or child protective services contact.
 - Any inappropriate discipline of a child by a provider, volunteer, or household member, including any incident that results in a child being forcefully shaken or thrown against a hard or soft surface during the child's hours of attendance.
 - Changes in individuals living in the household.

- Changes in hours of operation, phone number, or physical address.
- Upon the hiring of a new employee or volunteer and before the employment or volunteer work commences. A substitute or volunteer must be approved by the certifying agency before employment of volunteer work commences.

Home for providing family child care

- The current rule provides that each floor level used for child care shall have at least one unblocked exit. The proposed rule provides that each floor level used for child care shall have at least 2 exits, all exits shall be clear of obstruction, and the primary exit shall be a door or stairway providing unobstructed travel to the outside at street or ground level. The secondary exit must be either a door or stairway that provides unobstructed travel to the outside at street or ground level; a door or stairway leading to a platform or roof with railings which has an area of at least 25 square feet, is at least 4 feet long, and is not more than 15 feet above the ground level; or a window not more than 46 inches above the floor that is capable of being opened from the inside without the use of tool or removal of a sash, and which has a nominal window opening size of at least 20 inches in width and 24 inches in height. If the care is provided in a basement, the primary exit must be a door or stairway that provides unobstructed travel to the outside of the building at street or ground level and the secondary exit must be a door or stairway that provides unobstructed travel or a window not more than 46 inches above the floor that is capable of being opened from the inside without the use of tool or removal of a sash and which has a nominal window opening size of at least 20 inches in width and 24 inches in height.
- The home shall have a working carbon monoxide detector.
- The inside temperature of the home may not be less than 67 degrees Fahrenheit. If the inside temperature exceeds 80 degrees Fahrenheit, there must be air circulation with safe fans or other means if the home is not air conditioned.
- The home shall be free of hazards, including recalled products.
- The premises may not have any flaking or deteriorating paint on exterior or interior surfaces in areas accessible for children. Lead-based paint may not be used on any surface on the premises.
- Appliances for food preparation, serving, and clean-up must be kept clean, sanitary, and in good working condition.

Child health care

If a child attending child care or a child care operator's own child has a reportable communicable disease under ch. HFS 145 that is transmitted through normal contact, such as chicken pox, German measles, infectious hepatitis, measles, mumps, scarlet fever, or meningitis, a provider shall notify the local public health officer and parents of all the enrolled children. A child who has or had may not be admitted to certified child care unless the child's parents provide a statement from a physician that the child's condition is no longer contagious or the child has been absent for a period of time equal to the longest usual incubation period for the disease as specified by the Department of Health and Family Services.

Supervision

- The child care operator shall have a designated adult who can provide assistance in the event an unexpected emergency. The emergency back-up provider must be at least 18 years of age and able to provide an acceptable level of child care.

- When the children are playing outside, a provider must be outside with the children and provide both sight and sound supervision at all times.
- When a child care operator cares for children in the children's own home, the operator is not required to comply the group size limits and the operator may not care for any children who do not reside in the home.

Activities and equipment

- The proposed rules refine the requirements on activities that providers must plan for children in care based on the Wisconsin Model Early Learning Standards. The proposed rules add new requirements that a provider read to the children at least 15 minutes daily and plan a balance of activities to protect children from excess fatigue and overstimulation.
- The proposed rules create a new subsection on safe indoor and outdoor play equipment. The rules require that:
 - Equipment shall be scaled to the size and developmental level of the children in care.
 - Equipment shall be constructed in a sturdy manner and be in good operating condition with no sharp, rough, loose, or pointed edges.
 - Large, inflatable jumping toys may not be used during hours of child care.
 - Various types of play equipment shall be provided to allow for large and small muscle activity, dramatic play, and intellectual stimulation.
 - Indoor play equipment shall be provided to allow each child a choice of at least 3 activities involving equipment when all children are using equipment.
 - Outdoor play equipment shall be provided to allow each child at least one activity when all children are using equipment at the same time.

Provider and parent communication

The current rules require the provider to develop written information that specifies the charge for child care and the expected frequency of payment for the service. The proposed rules require that the payment information be in a contract that is signed by the child care operator and each child's parent or guardian. The child care operator shall charge the same rates for publicly funded parents and private pay parents.

Prohibited discrimination

The current rule provides that a child care operator may not discriminate on the basis of race, color, sex, sexual orientation, creed, handicap, national origin, or ancestry in accepting children or in the employment of employees. The proposed rules add socioeconomic background as a basis on which child care operators may not discriminate.

School-age child care programs

- The director of a school-age program must have graduated from high school, obtained a high school equivalency diploma, or obtained a certificate of general education development.
- No staff member, volunteer, visitor or parent with symptoms of communicable disease or physical illness, or whose behavior gives a reason to be concerned for the safety of the children, may be allowed on the premises of the program.
- The staff members shall be physically and emotionally able to provide responsible child care.

- The facility inspection report by the Department of Commerce must be filed in the county or tribal agency. The current rule requires the report to be filed in licensing office of the Department of Health and Family Services' regional office.
- The premises shall have no flaking or deteriorating paint on exterior or interior surfaces in areas accessible for children. Lead-based paint may not be used on any surface on the premises.
- The inside temperature may not be less than 67 degrees Fahrenheit.
- If the inside temperature exceeds 80 degrees Fahrenheit, fans must be provided to improve air circulation.
- The certified child care operator shall keep a current, written record of the daily hours of attendance of each child in care, including the actual arrival and departure times for each child. Attendance records shall be kept for at least 3 years.
- A working cellular phone shall be taken on field trips.
- May not hit, spank, pinch, shake or inflict any other form of corporal punishment on a child, or use any discipline which is frightening to the child, including binding or trying to restrict the child's movement or enclosing the child in a confined space such as a closet, basement, locked room, box, or similar cubicle.
- Each child and adult being transported in a vehicle with a seating capacity of 15 or fewer shall be seated and properly restrained in an individual seat belt or, for a child under 8 years of age, a child safety restraint system in compliance with s. 347.48 (2m) and (4), Stats as follows:
 - If a child is at least 4 years old but less than 8 years old, weighs at least 40 pounds but not more than 80 pounds, and is not more than 57 inches in height, the child shall be properly restrained in a shoulder-positioning child booster seat.
 - A child under 13 years of age may not ride in the front seat of a vehicle.
- The program shall have a written transportation permission slip signed by a parent or guardian on file.
- No child may be left unattended in a vehicle.

Summary of related federal regulations. There are no applicable federal regulations.

Comparison with rules in adjacent states. Iowa allows child care subsidy payments to be made to a nonregistered family child care home. The Iowa Department of Human Services sends the adult caretaker selected by the parent a pamphlet on minimum health and safety requirements and a payment application. The application must be signed by the provider and returned to the department before payment may be made. Signature on the form certifies the provider's understanding of and compliance with the conditions and requirements, including minimum health and safety requirements, limits on the number of children for whom care may be provided, unlimited parental access to the children during hours when care is provided, and conditions that warrant nonpayment.

Illinois allows child care subsidy payments to a day care home exempt from licensing if not more than 3 children are care for, including the provider's own children, unless all children are from the same household. The provider may not have certain criminal convictions or child abuse and neglect findings.

Minnesota allows child care subsidy payments to legal nonlicensed providers who satisfy registration requirements and provide the county with an assurance that the provider is in

compliance with state and local health ordinances and building and fire codes applicable to the premises where child care is provided. A county may conduct criminal history background, county record, and district court record investigations on providers and other persons with access to children in care. A county may deny payment if a the county know a particular provider is unsafe or that the circumstances of the child care arrangement are unsafe. A provider must obtain an immunization record for each child in care within 90 days of starting to care for the child. A provider may not charge child care assistance participants more than families not receiving child care assistance for like services.

Michigan regulates family child care homes for the care of 1 to 6 unrelated children by requiring registration and certification of compliance with applicable rules. The rules require that the registrant have a high school diploma or equivalent, have a written and signed agreement with a responsible person who is 18 years of age or older to provide care during an emergency situation, report to the department within 7 days if any person who care for children or lives in the home has been treated on an inpatient or outpatient basis for an emotional, mental, or substance abuse problem during the last 2 years or if any person has been admitted to or released from a correctional facility. The registrant shall complete no fewer than 10 hours of training each year, shall maintain a file with a statement by a licensed physician that attests to the mental and physical health of all caregivers, and shall retain daily attendance records for 4 years that show arrival and departure times for each child in care. All child care homes shall have at least 2 remotely located exits for every floor level occupied by children. A window may be used as a second exit if, among other things, it is of a size and design to allow for the evacuation of all children and caregiving staff.

Summary of factual data and analytical methodologies. The Department collaborated with the Child Abuse and Neglect Prevention Board and the child care licensing staff of the Department of Health and Family Services to implement the requirement on training to prevent shaken baby syndrome in 2005 Wisconsin Act 165. The proposed rules incorporate the changes required by 2005 Wisconsin Act 106 on using booster seats and other restraints for children under 8 years old in motor vehicles used to transport children. The Department also met with certification workers in county and tribal agencies and with family child care providers represented by AFSCME to discuss suggested rule changes.

Effect of rule on small businesses. The proposed rules will affect small businesses but will not have a significant economic impact on a substantial number of small businesses.

Analysis used to determine effect on small businesses and initial regulatory flexibility analysis. The standards in these rules are intended to protect and promote the health, safety and welfare of children in the care of unlicensed child care providers who receive reimbursement through state or federal funds.

Reporting requirements in the current rule include a general requirement to report any changes that affect the provider's eligibility under this chapter. Providers found this general requirement unclear so the proposed rules specify the important eligibility changes that must be reported to the county or tribal agency.

Bookkeeping requirements in the proposed rules include a requirement that there be a contract for each enrolled child be signed by the child care operator and a parent or guardian, and the operator must have on file a copy of the driver's license for all persons transporting children.

Professional skills include a requirement that a school-age child care operator have a high school diploma or equivalent; all certified family child care operators, employees, and volunteers who provide care and supervision for children under 5 years of age shall receive department-approved training on shaken baby syndrome and appropriate ways to manage crying or fussing children; and all family child care operators and substitutes who have worked at least 240 hours in a Level I (regular) home must take 2 credits of early childhood training or non-credit department-approved training. The T.E.A.C.H. Early Childhood® WISCONSIN Scholarship Program offers scholarship opportunities to teachers, family child care providers, center directors and administrators for credit-based training.
