11. Fiscal Analysis Summary

Chapter HFS 10 is the department's rule that guides the implementation of the department's Family Care program. Included in these provisions are standards for confidentiality which prohibit disability benefit specialists from disclosing personally identifying information about a client without the client's consent unless required by law. Because disability benefit specialists are permissive reporters, and thus not required to report abuse, neglect, or financial exploitation of elder adults and adults at risk under ss. 46.90 (4) (ar) and 55.043 (1m) (br), Stats., s. HFS 10.23 (2) (d) 2., effectively prevents disability benefits specialists from making such disclosures.

The department is revising s. HFS 10.23 (2) (d) 2., by adding language that would permit disability benefit specialists to report abuse, neglect, or financial exploitation of elder adults or adults-at-risk without violating that section's non-disclosure provisions.

Amending s. HFS 10.23 (2) (d) 2., to allow disability benefit specialists to report abuse, neglect, or financial exploitation under ss. 46.90 (4) (ar) and 55.043 (1m) (br), Stats., would help to ensure that elder adults and adults-at-risk who may have been abused, neglected, or financially exploited are brought to the attention of the abuse, neglect and exploitation response systems outlined under ss. 46.90 and 55.043, Stats.

There is a potential increase in costs to counties that would be associated with counties responding to additional reports of abuse, neglect, or financial exploitation generated as a result of disability benefit specialists being able to make such reports. However, it is expected that this impact would be minimal since many other parties can report such incidents so that the impact of this change would only likely affect the timing and source of the report.
