Assumptions Used in Arriving at Fiscal	Estimat	e						
The proposed rule changes the amounts eligible families would receive by increasing the amounts for smaller size families and decreasing the amounts for larger size families. The amounts were arrived at by attempting to make the overall fiscal impact cost neutral that is within the existing amount of funds allocated for emergency assistance. Average family sizes receiving emergency assistance grants in SFY 07-08 were used in the calculation. The rule also changes the amount payable to an eligible family due to energy crisis from the current unlimited level to a maximum of \$500. This change will allow the agency to use funds otherwise going to pay for energy services to pay for other emergencies. In addition, the rule allows a payment to families who are renters and in a situation where the building they are living in is subject to foreclosure. While this will increase the number of cases eligible for emergency assistance it is estimated to be within what the current allocation can absorb. The proposed rule also changes is not expected to have a significant fiscal eligbility to make it similar to the eligibility criteria for W-2. This change is not expected to have a significant fiscal effect because many agencies already applied the W-2 criteria due to confusing language in the current rule.								
Long-Range Fiscal Implications None
