Policy Problem Addressed by the Rule

2013 Wisconsin Act 20 created s. 115.28(7)(g), Stats., which requires the Department of Public Instruction (DPI) to grant a charter school teaching license to any person who has a bachelor's degree and demonstrates, based on criteria established by the DPI, that the person is proficient in the subject or subjects he or she intends to teach. PI 34 will be modified to include the criteria that a person must meet to demonstrate that the person is proficient in the subject or subjects he or she intends to teach.

Summary of Rule's Economic and Fiscal Impact on Specific Businesses, Business Sectors, Public Utility Rate Payers, Local Governmental Units and the State's Economy as a Whole (Include Implementation and Compliance Costs Expected to be Incurred)

Local:

The effect on local school districts is indeterminate. It is unclear how this change to the way charter school teachers are licensed will affect the supply of teachers for charter schools and non-charter schools.

State:

Implementing a new framework for issuing charter school teaching licenses may slightly increase costs, but those costs could be absorbed by the department.

Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule

This proposed rule change will include the proficiency criteria established by DPI that a person must meet in order to be granted a charter school teaching license. The Department is required to establish criteria by 2013 Wisconsin Act 20.

Long Range Implications of Implementing the Rule

The Department will establish criteria for determining whether an educator is proficient in the subject the educator intends to teach for the purposes of being granted a charter school teaching license. The Department is required to do this under 2013 Wisconsin Act 20.
