8. Would Implementation and Compliance Costs Be Greater Than \$20 million?

Yes No

9. Policy Problem Addressed by the Rule

The rule is necessary to prevent harvest and consumption of lake sturgeon from the Menominee River downstream of the Grand Rapids Dam.

10. Summary of the businesses, business sectors, associations representing business, local governmental units, and individuals that may be affected by the proposed rule that were contacted for comments.

The proposed rule will primarily affect recreational anglers. It is not expected that there will be any economic impact or change directly related to these rule changes.

It is not expected that this rule would affect businesses that register sturgeon. There are only two non-department sturgeon registration stations in the area and only 10 lake sturgeon have been harvested above the Menominee Dam since 2006.

No comments were received during the EIA open comment period July 20 to August 3, 2015.

11. Identify the local governmental units that participated in the development of this EIA.

No local governments requested to be consulted on development of the EIA.

12. Summary of Rule's Economic and Fiscal Impact on Specific Businesses, Business Sectors, Public Utility Rate Payers, Local Governmental Units and the State's Economy as a Whole (Include Implementation and Compliance Costs Expected to be Incurred)

It is not expected that this rule would affect businesses that register sturgeon. There are only two non-department sturgeon registration stations in the area and only 10 lake sturgeon have been harvested above the Menominee Dam since 2006.

13. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule

The emergency rule is necessary to prevent the harvest and consumption of lake sturgeon that have been transported from Green Bay upstream past the Menominee Dam. In addition, it will prevent the harvest and waste of sturgeon that should not be eaten.

14. Long Range Implications of Implementing the Rule

In spring of 2015, adult lake sturgeon exceeding 60 inches were transported upstream past the dam via a capture and sort facility located at the Menominee Dam. The active movement of sturgeon past the dam is being done to provide the sturgeon greater access to spawning habitat in the Menominee River, up to the Grand Rapids Dam, and improve population numbers. The rule extends the

N/A

16. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)
The Menominee River is a Wisconsin-Michigan boundary water. The Michigan Department of Natural Resources is also pursuing a rule change to match the lake sturgeon regulations proposed in this rule. The change made by both states will ensure there are consistent lake sturgeon regulations on this shared waterbody.
