Related statute or rule:

Plain language analysis:

This rule implements 2013 Act 244 by creating DE 10.

DE 10.01 defines mobile dentistry program as a program which uses portable equipment or supplies in a location that is not a dental or hospital facility or is a self-contained facility that moves. The definition excludes the following: dental or dental hygiene care provided within a

30 mile radius of a main or satellite facility provided the care is billed by that facility and necessary follow-up care is being provided by the dentist or dental hygienist; the care is being provided to no more than 2 per day to a new or established patient of record of a main or satellite dental facility; and the Department of Health conducting screenings as part of the Centers for Disease Control and Prevention surveys. The first two exceptions allow for a dentist or dental hygienist to make “house calls” and the last recognizes the unique nature of the survey screenings.

DE 10.02 creates the registration requirements. An applicant would be required to fill out an application, pay a fee, and provide a list of all employees or contractors who are providing dental or dental hygiene care and their Wisconsin dentist or dental hygienist license number. A renewal fee requires a renewal form and fee and a current list of their employees or contractors. If a person owns or operates more than one mobile dentistry program, a registration is required for each program.

DE 10.03 requires access to patient records. Each patient is to be provided with the name and contact information of the program and the registration number. At the time of providing services, the program is required to provide the patient with a written description of the services provided, the provider’s name and license number and the findings and recommendations. Mobile dentistry records are subject to the same rules governing a dentist or dental hygienist working in a dental facility. A mobile dentistry program is required to provide access to patient records.

DE 10.04 requires a mobile dentistry program to have a written protocol for follow-up care in a dental facility that is permanently established within a 60 mile radius of where the mobile dentistry services were provided. The protocol must include a written agreement with at least one provider for emergency treatment.

DE 10.05 lists unprofessional conduct as a violation of the standards of conduct all licensed dentists and dental hygienists are required to maintain or the specific mobile dentistry access to patient records or written protocols. In addition, it is unprofessional conduct for a mobile dentistry program registrant to fail to update the department within 30 days of new employees or contractors providing dental or dental hygienist services in Wisconsin.

Summary of, and comparison with, existing or proposed federal regulation: None

Comparison with rules in adjacent states:

Illinois: Illinois defines mobile dental vans and portable dental units as any self-contained or portable dental unit in which dentistry is practiced that can be moved, towed, or transported from one location to another in order to establish a location where dental services can be provided. A dentist providing services through a mobile dental van or portable dental unit is to provide to the patient or the patient’s parent or guardian, in writing, the dentist’s name, license number, address, and information on how the patient or the patient’s parent or guardian may obtain the patient’s dental records.

Iowa: Iowa does not require the registration of mobile dentistry programs.

Michigan: Michigan defines mobile dentistry as a self-contained, intact facility in which dentistry or dental hygiene is practiced that may be transported from one location to another or a site used on a temporary basis to provide dental services using portable equipment. An application shall include: a list of each dentist, dental hygienist and dental assistant who will provide care including each individual's name, address, telephone number and license number; a written plan and procedure for providing emergency follow-up care to each patient; a signed memorandum of agreement between the operator and at least one dentist who can arrange for or provide follow-up services at a site within a reasonable distance for the patient; if provides only preventative services, a signed memorandum of agreement for referral for comprehensive dental services between the operator and at least 1 dentist; and proof of general liability insurance covering the mobile dental facility. If an operator has a memorandum of agreement due to its status as a state of Michigan designated or funded oral health prevention program with oversight from the department of community health, the operator is exempt from any requirement concerning a memorandum of agreement. The patient shall be provided a copy of a written treatment plan which shall address comprehensive services to be provided either at the mobile dental facility or through a dentist under a memorandum of agreement with the operator of the mobile dental facility. If the operator is unable to make arrangements for continued treatment, he or she shall place written documentation of the attempts in the patient record and make the documentation available to the department upon request. The operator shall provide access to records upon request.

Minnesota: Minnesota does not require the registration of mobile dentistry programs.

Summary of factual data and analytical methodologies:

The Board formed a committee which looked at the proposals from stakeholders as well as reviewing other states' laws. The committee and Board spent considerable time discussing issues relating to the definition of mobile dentistry programs and protocols for follow-up care balancing the accessibility of the programs to operate in the state with the safety of the public.

Analysis and supporting documents used to determine effect on small business or in preparation of economic impact analysis:

The rules were posted for economic comments for 14 days. One comment was received requesting an exemption from the rule for mobile dentistry programs receiving partial funding from the state. The Board invited Matt Crespino of Children's Health Alliance of Wisconsin to a meeting to discuss his economic concerns. Mr. Crespino focused on exempting his programs and not on the economic impact on mobile dentistry programs in general. The Board decided not to make changes to the rule to mitigate the economic impact to programs receiving state funds.

Throughout the rule promulgation process, the Board solicited comments from stakeholders. A main concern of all stakeholders is for patients treated by a mobile dentistry program to obtain follow-up care. The Board considered many alternatives to reach this objective with a goal for the rule to not be a burden on small businesses. Requiring a mobile dentistry program to have

protocols for follow-up care, including a written agreement for emergency care meets the objective of protecting public health but not burdening businesses.
