Analysis Prepared by the Department of Health and Family Services

Under ch. 153, Stats., the Department of Health and Family Services is responsible for collecting, analyzing and disseminating a variety of health care data. In 2000, the Department substantially revised ch. HFS 120 to implement changes made to ch. 153, Stats., included in 1997 Wisconsin Act 231 and 1999 Wisconsin Act 9. The principal purpose of this proposed rulemaking order is to incorporate the Department's proposed extension of its data collection, analysis and dissemination activities to hospital emergency departments. To support these activities, the Department is also proposing rules that will give the Department the authority to assess fees on hospitals to cover the Department's additional data-related expenses.

This rulemaking order also proposes to make minor administrative changes to ch. HFS 120 to address Department organizational changes, amend providers' trading partner agreements, and revise the procedure under which providers submit data to the Department. Specifically, the Department proposes to amend references to a section of the Department that no longer exists; clarify that providers using qualified vendors to submit data to the Department must submit original and notarized copies of trading partner agreements; and make more general in rule the means by which providers submit data to the Department, by requiring the electronic submission of data instead of submission via the internet. Finally, in section 3 of this proposed rulemaking order, the Department proposes to modify hospital rate increase reporting requirements by requiring hospitals to express the price increases as annualized percentages.

The Department's authority to repeal and recreate these rules is found in ss. 153.75, Stats. The rules interpret ss. 153.05 (5), (8) and (13), 153.08 (2), 153.45 (1), (1m), (3) and (5), 153.50 (4) (b), 153.60 (1) and (3), 153.67 and 153.75, Stats.
