Business Impact Analysis (Summary)

Cranberry growers are all small businesses. In 2012 the growers collectively produced a total crop of 4,830,000 barrels valued at approximately \$231 million. The price per barrel in 2012 was \$47.80. At the assessment rate of 10 cents per barrel the assessment in 2012 equaled approximately .02 percent of the crop value. If the Cranberry Board assess at the maximum rates, the assessment, based on 2012 price per barrel, will equal .031 % of the crop value in 2015 and 2016, .042% in 2017 and 2018 and .052% thereafter. The result is a modest cost increase for each grower. However, if the use of assessments produces the kind of market share increase that the industry has seen in recent years the increased assessment cost will be more than made up for by increased sales.
