Plain language analysis:

The purpose of this rule change is to acknowledge innovative instructional methods used by school districts to provide direct instruction. The proposed rule provides a definition of innovative instructional design as an instructional program aligned to school district standards and used to improve student academic achievement through instruction offered outside of the normal school day, virtually, or in an alternative setting. By amending this rule, the proposed rule allows that hours of direct instruction provided through innovative instructional models count toward the required hours of direct instruction under s. 121.02 (1) (f), Stats.

Summary of, and comparison with, existing or proposed federal regulations: N/A

Comparison with rules in adjacent states: N/A

Summary of factual data and analytical methodologies:

Over time, school districts have developed new and innovative methods of direct instruction.
