### **Initial Regulatory Flexibility Analysis:**

The rule change would have minimal impact on sport anglers. Similar regulations, including the 3-walleye daily bag limit, are already in place through a related emergency rule. Changes in angling regulations enacted to accommodate declared, expected, or realized tribal harvest could potentially alleviate or minimize regional social and economic disruption sometimes associated with reductions in walleye bag limits on off-reservation waters within the Ceded Territory. Exact economic impact of the rule is unknown, but more predictable, stable angling regulations may have a positive indirect impact on fishing-related businesses.
