Rule Information

The goals of this rule package are to adequately protect the public while recreating in and on Wisconsin's waters; revise Wisconsin's bacteria water quality criteria to be consistent with EPA's latest recommendations; and update the permit requirements for sewage treatment works to ensure consistency with EPA's policies. To accomplish these goals, the department proposes to revise the bacteria water quality criteria for recreation in ch. NR 102, Wis. Adm. Code, remove fecal coliform criteria for individual waters from ch. NR 104, Wis. Adm. Code, and revise the permit requirements for publicly owned and privately owned domestic sewage treatment works in ch. NR 210, Wis. Adm. Code.

Initial Regulatory Flexibility Analysis:

Privately owned sewage treatment facilities that currently disinfect wastewater are likely to be affected by this rule. There are currently seven such facilities that may be small businesses, such as mobile home parks or nursing homes. Annual costs for switching from monitoring wastewater for fecal coliform to monitoring for *E. coli* are projected to be approximately \$132 per facility. Total costs for these facilities combined (if all were small businesses) are estimated at \$924 annually.
