Most traffic crashes in winter are caused by drivers going too fast for conditions. Posted speed limits apply when travel conditions are ideal. Drivers are advised to slow down when roads are slick or visibility is reduced. #wiwx

I'm glad you posted a photo of a 4WD pickup truck, because those are the drivers who tend to drive far too fast and aggressively for those weather conditions.

I wonder what is the percentage of accidents from cars driving in the "fast lane".

Why don't you encourage the use of snow tires? At least provide information on the benefits of them. You don't even mention the importance of tires on your winter safety page. [wisconsindot.gov/Pages/safety/e...](http://wisconsindot.gov/Pages/safety/e...)
