

NOTICE OF PROPOSED GUIDANCE DOCUMENT

News release on State Patrol aerial enforcement

Pursuant to Wis. Stat. s. 227.112, the Wisconsin Department of Transportation is hereby seeking comment on a news release related to State Patrol aerial enforcement (Chapter 346), a proposed guidance document.

PUBLIC COMMENTS AND DEADLINE FOR SUBMISSION

Comments may be submitted to the Wisconsin Department of Transportation for 21 days by:

1. Department's website:

<https://trust.dot.state.wi.us/act369/?id=OPA264&uri=file:I39-90DaneCounty8-19&division=OPA>

2. Mailing written comments to: Office of
Public Affairs
Wisconsin Department of Transportation 4822
Madison Yards Way
PO Box 7910
Madison, WI 53707-7910

WEBSITE LOCATION OF FINAL GUIDANCE DOCUMENT

The final version of this guidance document will be posted at wisconsindot.gov to allow for ongoing comment.

State Patrol plans aerial enforcement Tuesday along I-39/90 in Dane County

To enhance safety for all travelers, the Wisconsin State Patrol plans to use aircraft and ground-based officers to enforce speed limits and other traffic laws on Tuesday (August 20) along Interstate 39/90 in Dane County. If weather conditions are unfavorable for flying, enforcement typically proceeds using ground-based units. An aerial enforcement mission along I-39/90 in late July resulted in 25 traffic stops including one motorist traveling 83 mph in the 60 mph work zone.

“We publicly announce many of these enforcement efforts to reinforce that our goal is voluntary compliance with traffic laws,” said Captain Jason Zeeh, Commander of the State Patrol’s Southwest Region Post in DeForest. “Officers will be watching for speeding, tailgating or other dangerous driving behaviors that risk the safety of all travelers.”

Most State Patrol aerial missions are made possible through federal funds specifically designated to support traffic law enforcement. The State Patrol analyzes data on traffic citations, crash reports and related information to identify highway corridors for enforcement initiatives.

State Patrol aircraft use a timing device known as VASCAR (Visual Average Speed Computer and Recorder) along with highway markings to determine vehicle speeds. When pilots detect speeders, aggressive or reckless drivers, they contact ground-based units to initiate a traffic stop.
