

2019 Landscape Pesticide Registry is Available Online

The 2019 Landscape Pesticide Registry is available on the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) website at https://datcp.wi.gov/Pages/Programs_Services/LandPestReg.aspx

The dataset of registered properties and participants is available as a sortable spreadsheet, a PDF and as an interactive map. The web map is a visual reference to display parcels listed on the Registry. Users can zoom to a specific city or address and look for yellow circles that identify properties listed on the registry. You should still use the downloadable spreadsheet or PDF file to verify if your customer's address is registered.

If your customer's address is on the registry, prior to your business making a landscape pesticide application provide 12 hours advanced notice to the person who listed that particular address. This includes application to turf, ornamentals, trees, shrubs, lawns, mulched areas or to control adult mosquitos. [Ch ATCP 29.56\(8\) Wis Adm Code](#) requires you provide the following information:

1. Name, address, and telephone number of the business making the application.
2. Address of the landscape to be treated.
3. Scheduled date of application. If the date changes after you give notice, you must give a revised notice.
4. The brand name, product name, or common chemical name of each pesticide that may be applied.

Homeowners and renters must annually sign up if they want to know in advance when a business is going to apply pesticides to neighboring properties. The 2019 registry is valid between March 15, 2019 and March 14, 2020.
