ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

degree, the entity shall require either a minimum cumulative grade point average of 2.75 on a 4.0 scale, or evidence other than grade point average by entities that use alternative measures of performance which shall be approved by the state superintendent. Additionally, current rule provides that for preparation programs at the post-baccalaureate level, the entity shall require either a minimum cumulative grade point average of 3.0 on a 4.0 scale, or evidence other than grade point average by entities that use alternative measures of performance which shall be approved by the state superintendent. Under the current rule, no more than 10 percent of the cohort of students completing the educator preparation program may be measured using alternative measures of performance.

The proposed rule amends ch. PI 34 to create flexibility for license applicants and for entities which use alternative measures of performance as a condition for receiving licensure by eliminating the prohibition that no more than 10 percent of the cohort of students completing an educator preparation program may be measured using alternative measures of performance. The proposed rule will ensure that entities using an alternative measure of performance are able to endorse each candidate for licensure while maintaining high standards in the use of each alternative measure. Without a rule change, the Department would be required to implement PI 34 as the rules currently exist, thus limiting the flexibility in which entities may endorse qualified candidates for licensure. Alternative measures would continue to be approved by the state superintendent in absence of a rule change.

- 16. Long-Range Implications of Implementing the Rule
 - The proposed rule will make the licensing process more flexible for applicants and educator preparation programs, thereby helping address staffing needs related to certain licensees in school districts.
- 17. Compare With Approaches Being Used by Federal Government
 - Because education in the United States is typically governed by each state and local government, federal regulations are generally silent with respect to teacher licensure. As a result, the requirements for teacher licensure vary by state.
- 18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

 There does not appear to be comparable rules regarding alternative measures of performance for applicants completing an educator preparation program as a condition for receiving licensure.
