<p>9. Estimate of Implementation and Compliance to Businesses, Local Governmental Units and Individuals, per s. 227.137(3)(b)(1). \$Approximately 6,832 businesses are subject to the fees addressed by the rule. The proposed rule would result in an increase for those business of between \$60 to \$450 per business annually depending on the size of business and quantity of chemicals. Approximately 94% of impacted businesses would have an increase between \$60 and \$145 per year.</p>

<p>14. Summary of Rule's Economic and Fiscal Impact on Specific Businesses, Business Sectors, Public Utility Rate Payers, Local Governmental Units and the State's Economy as a Whole (Include Implementation and Compliance Costs Expected to be Incurred) See the attached analysis. There should be no additional fiscal impact.</p>	
<p>15. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule Implementing the rule will allow the statutorily-required state-level program to remain solvent. The only alternative would be to reduce funding to the program which would not allow the program to meet statutory requirements.</p>	
<p>16. Long Range Implications of Implementing the Rule Allowing the fees to be increased for inflation will ensure the solvency of the statutorily-required state-level program over the long term.</p>	
<p>17. Compare With Approaches Being Used by Federal Government</p>	

ADMINISTRATIVE RULES

Fiscal Estimate & Economic Impact Analysis

There is no similar federal law or regulation to WEM 1.

18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

WEM is statutorily required to impose inventory fees for facilities submitting Tier II reports. Tier II reports convey specific information on hazardous chemicals present at a facility and are required by the US Environmental Protection Agency for facilities that are required to prepare or have available a Safety Data Sheet (also known as the Material Safety Data Sheet) under the regulations implementing the Occupational Safety and Health Act of 1970. Illinois, Iowa, and Michigan do not impose fees and therefore fund their programs from general state funds. Minnesota charges a \$500 fee for facilities that generate large quantities of hazardous waste (> 1,000 kg per month) and additional fees for toxic chemical releases (\$500 for releases < 25,000 pounds; \$0.02/pound for releases > 25,000 pounds).
