***Analysis by the Legislative Reference Bureau***

This bill allows member-based state or national chiropractic organizations to be program sponsors of continuing education for chiropractors, chiropractic radiological technicians, and chiropractic technicians. Specifically, those chiropractic organizations may sponsor continuing education programs if they 1) are an entity exempt from federal income taxes, 2) have existed as an entity exempt from federal taxes for at least five years, 3) have a purpose that is not solely providing continuing education programs, and 4) engage in measurable advocacy efforts to promote the chiropractic profession. Current law generally requires chiropractors, chiropractic radiological technicians, and chiropractic technicians to complete continuing education every two years to renew their licenses or certificates.

The bill also requires the Chiropractic Examining Board to approve, for purposes of providing the education needed to obtain a chiropractor nutritional counseling certificate, a postgraduate nutrition program provided by an organization that is eligible to provide continuing education for chiropractors, if the postgraduate nutrition program satisfies all of the requirements established by the board. Under current law, the board has authority to approve the postgraduate nutrition programs that chiropractors must complete to obtain a nutritional counseling certificate.

Also, under the bill, providers of continuing education may not delegate the tasks of monitoring or recording attendance, providing evidence of attendance, verifying required course content, or providing information on instructors for continuing education programs. The bill also requires that a program sponsor for continuing education for chiropractic radiological technicians or chiropractic technicians must submit its program to the board for approval. In addition, sponsors of approved continuing education programs must notify the board of any information or change to information related to satisfying continuing education or program sponsor requirements.
