***Analysis by the Legislative Reference Bureau***

**NURSING PRACTICE AND LICENSURE**

This bill makes various changes to practice, licensure, and certification requirements for nurses, which are administered by the Board of Nursing.

***Licensure of advanced practice registered nurses***

Under current law, a person who wishes to practice professional nursing must be licensed by the Board of Nursing as a registered nurse (RN). This bill creates an additional system of licensure for advanced practice registered nurses (APRNs), to be administered by the board. Under the bill, in order to apply for an APRN license, a person must 1) hold, or concurrently apply for, an RN license; 2) have completed an accredited graduate-level or postgraduate-level education program preparing the person to practice as an APRN in one of four recognized roles and hold a current national certification approved by the board; 3) possess malpractice liability insurance in an amount determined as provided in the bill; 4) pay a fee determined by the Department of Safety and Professional Services; and 5) satisfy certain other criteria specified in the bill. The bill also allows a person who has not completed an accredited education program described above to receive an APRN license if the person 1) on January 1, 2022, is both licensed as an RN in Wisconsin and practicing in one of the four recognized roles; and 2) satisfies additional practice or education criteria established by the board. The bill also, however, automatically grants licenses to certain RNs, as further described below. The four recognized roles, as defined in the bill, are 1) certified nurse-midwife; 2) certified registered nurse anesthetist; 3) clinical nurse specialist; and 4) nurse practitioner. The bill requires the board, upon granting a person an APRN license, to also grant the person one or more specialty designations corresponding to the recognized role or roles for which the person qualifies.

The holder of an APRN license may append the title “A.P.R.N.” to his or her name, as well as a title corresponding to whichever specialty designations that the person possesses. The bill prohibits any person from using the title “A.P.R.N.,” and from otherwise indicating that he or she is an APRN, unless the person is licensed by the board as an APRN. The bill also prohibits the use of titles and abbreviations corresponding to a recognized role unless the person has a specialty designation for that role. However, the bill allows an APRN to delegate a task or order to another clinically trained health care worker if the task or order is within the scope of the APRN’s practice, the APRN is competent to perform the task or issue the order, and the APRN has reasonable evidence that the health care worker is minimally competent to perform the task or issue the order under the circumstances. The bill requires an APRN to adhere to professional standards when managing situations that are beyond the APRN’s expertise.

Under the bill, when an APRN renews his or her APRN license, the board must grant the person the renewal of both the person’s RN license and the person’s APRN license. The bill requires all APRNs to complete continuing education requirements each biennium in clinical pharmacology or therapeutics relevant to the APRN’s area of practice and to satisfy certain other requirements when renewing a license.

***Practice of nurse-midwifery***

This bill repeals licensure and practice requirements specific to nurse-midwives and the practice of nurse-midwifery, including specific requirements to practice with an obstetrician. Under the bill, “certified nurse-midwife” is one of the four recognized roles for APRNs, and a person who is

licensed as a nurse-midwife under current law is automatically granted an APRN license with a certified nurse-midwife specialty designation. The bill otherwise allows nurse-midwives to be licensed as APRNs if they satisfy the licensure requirements, except that the bill also requires that a person applying for a certified nurse-midwife specialty designation be certified by the American Midwifery Certification Board. The bill also requires an APRN with a specialty designation as a certified nurse-midwife to file with the board, and obtain the board's approval of, a plan for ensuring appropriate care or care transitions in treating certain patients if the APRN offers to deliver babies outside of a hospital setting.

***Prescribing authority***

Under current law, a person licensed as an RN may apply to the board for a certificate to issue prescription orders if the person meets certain requirements established by the board. An RN holding a certificate is subject to various practice requirements and limitations established by the board and must possess malpractice liability insurance in an amount determined by the board.

The bill eliminates certificates to issue prescription orders and generally authorizes APRNs to issue prescription orders. A person who is certified to issue prescription orders under current law is automatically granted an APRN license with his or her appropriate specialty designation. RNs who are practicing in a recognized role on January 1, 2022, but who do not hold a certificate to issue prescription orders on that date and who are granted an APRN license under the bill may not issue prescription orders. As under current law, an APRN issuing prescription orders is subject to various practice requirements and limitations established by the board.

The bill repeals a provision concerning the ability of advanced practice nurses who are certified to issue prescription orders and who are required to work in collaboration with or under the supervision of a physician to obtain and practice under a federal waiver to dispense narcotic drugs to individuals for addiction treatment.

**OTHER CHANGES**

The bill makes numerous other changes throughout the statutes relating to APRNs, including various terminology changes and technical changes relating to the Nurse Licensure Compact.
