

Chapter NR 37

LOWER WISCONSIN STATE RIVERWAY AESTHETIC MANAGEMENT SPECIFICATIONS FOR CUTTING AND HARVEST OF TIMBER

NR 37.01 Applicability.
NR 37.02 Purpose.
NR 37.03 Definitions.

NR 37.04 Timber management cutting and harvesting specifications.
NR 37.05 Variance.

Note: Chapter NR 37 was created as an emergency rule effective October 31, 1989.

NR 37.01 Applicability. This chapter applies to timber harvested under timber sale contracts executed on or after October 31, 1989. Parties to contracts executed before October 31, 1989 are encouraged to amend the contract to incorporate the restrictions in this chapter. Timber harvest and cutting under timber sale contracts executed on or after October 31, 1989, shall be consistent with subch. IV of ch. 30, Stats., and the rules established in this chapter and shall include specifications, terms and conditions necessary to ensure that this chapter and subch. IV of ch. 30, Stats., are met.

Note: Statutory Provisions Related to the Cutting of Woody Vegetations. These rules do not apply to nor govern the cutting of woody vegetation which includes trees that are not timber, that is prohibited by statute. Exceptions to the prohibition are summarized below.

Section 30.45 c3d and c3md prohibit the cutting of woody vegetation which includes trees that are not timber on the land or riverbed in the riverway except for the amount necessary for:

1. One strip 15 feet or less in width for each separately owned parcel of land on the river that is necessary for gaining access to the river. cs. 30.45 c3d cad and c3md cad, Stats.d
2. An activity for which a permit has been issued, and not revoked, under section 30.40 or 30.445 of the statutes cpermits for structures or mobile homes, walkways and stairways, cutting timber, utility facilities, bridges or piersd. cs. 30.45 c3d cadg and c3md cad, Stats.d
3. An activity that s. 30.44 of the statutes exempts from a permit. css. 30.45 c3d card and c3md cad, Stats.d
4. Maintenance of an easement or right-of-way for a utility facility. cs. 30.45 c3d cbd and c3md cad, Stats.d
5. Construction, reconstruction, modification, relocation, repair or maintenance of a high-voltage transmission line. cs. 30.45 c3d cbnd and c3md cad, Stats.d
7. Construction, modification, reconstruction or repair of a wharf allowed under s. 30.45 c9d of the statutes. cs. 30.45 c3d ccgd and c3md cad, Stats.d
8. Maintenance of a structure by a person who complies with the provisions of ss. 30.44 to 30.46 and s. 30.45 c1d, c2d and c4d to c13d of the statutes that apply to the structure. cs. 30.45 c3d ccerd and c3md cad, Stats.d
9. Maintenance of a right-of-way for a highway, private road or a railroad. cs. 30.45 c3d cdd and c3md cad, Stats.d
10. Modification, repair or reconstruction of a dam. cs. 30.45 c3d cdhd, and c3md cad, Stats.d
11. Removal of woody vegetation if a forester has issued a written determination that the woody vegetation is subject to an actual, potential or incipient infestation or infection by an insect or disease that is harmful to the woody vegetation. cs. 30.45 c3d cdpd and c3md cad, Stats.d
12. Removal of woody vegetation damaged by natural causes. cs. 30.45 c3d ced and c3md cad, Stats.d
13. Firewood for the person[s] agricultural or household use if the land owned or occupied by the person is more than 75 feet beyond the ordinary high water mark of the river. cs. 30.45 c3md cbd, Stats.d
14. Removal of woody vegetation necessary and reasonable for those agricultural use activities and structures specifically authorized under s. 30.46, Stats.

History: Cr. Register, November, 1990, No. 419, eff. 12-1-90.

NR 37.02 Purpose. The purpose of this chapter is to establish management specifications for the harvesting of timber in the lower Wisconsin state riverway pursuant to s. 30.42 c1d cdd, Stats., so that timber cutting or harvesting has minimal impact on the scenic beauty and natural value of the riverway.

History: Cr. Register, November, 1990, No. 419, eff. 12-1-90.

NR 37.03 Definitions. c1d XBasal areaY means the cross-sectional area 4 feet above ground expressed in square feet per acre of all trees with a diameter of 5 inches and larger.

c2d XBluff lineY means that point where there is a significant change in slope on the visual horizon when viewed from the river. This change in slope may take the form of a ridge protruding into the river valley.

c3d XBluff zoneY means the land area 200 feet in width from 100 feet behind the bluff line to 100 feet below the bluff line.

c4d XDepartmentY means the department of natural resources.

c5d XCutting and harvesting timberY means the severing of the timber from the land as well as all other aspects of the timber harvesting and transportation operation, but does not include the removal of firewood from tree tops resulting from the timber harvest, shearing of Christmas trees, pruning or other sound forest management practices not involving the severing of the timber from the land.

c6d XForest aestheticsY means the department publication, publ. FR-039-86, relating to timber harvest.

Note: This publication may be obtained from the bureau of forestry, DNR, P.O. Box 7921, Madison, WI 53707.

c7d XResource management zoneY means land in the riverway which is not included in the river edge zone, bluff zone or riverview zone.

c8d XRiverY has the meaning established in s. 30.40 c14d, Stats.

c9d XRiver edge zoneY means the land within the riverway from where tree growth begins on the river[s] edge and extending 75 feet landward.

c10d XRiverview zoneY means all land within the riverway which is visible from the river during the time when the leaves are on the deciduous trees.

c11d XRiverwayY has the meaning established in s. 30.40 c15d, Stats.

c12d XRiverway boardY means that board established under s. 15.345 c8d, Stats.

c13d XSelection cuttingY means the removal of selected trees throughout the range of merchantable sizes at regular intervals, either singly or in small groups, leaving a uniformly distributed stocking of desirable trees and size classes.

c14d XShelterwood cutY means a partial removal of mature trees leaving trees of desirable species and form to provide shade, seed source and a desirable seed bed for natural regeneration with the final removal of the overstory after adequate regeneration is established.

c15d XSilvicultural and forest aesthetics handbookY means the department handbook 2431.5 relating to timber harvest.

Note: This handbook may be obtained from the department of natural resources Directives Section, P.O. Box 7921, Madison, WI 53707.

c16d XSmall regeneration cutY means a harvest of not more than one-third of the contiguous forested ownership within a 10-year period with each opening not exceeding 6 acres in size and not closer than 75 feet at their closest points.

c17d XSwitchbackY means a sharp curve or significant change in direction of a road.

c18d XTimberY has the meaning established in s. 30.40 c18md, Stats.

c19d XTimber standY means all trees occupying an area capable of producing timber, including but not limited to, logs, poles, posts, pulpwood and other cordwood products.

c20d XTreeY means a woody plant which at maturity is 20 feet or more in height, with a single trunk, unbranched for at least several feet above the ground and having a more or less definite crown.

c21d XVisible from the riverY has the meaning established in s. 30.40 c20d, Stats.

c22d XVisually inconspicuousY has the meaning established in s. 30.40 c21d, Stats.

History: Cr. Register, November, 1990, No. 419, eff. 12-1-90; correction in c12d was made under s. 13.93 c2md cbd 7., Stats., Register November 2001 No. 551; correction in c12d under s. 13.92 c4d cbd 7., Stats., Register January 2017 No. 733.

NR 37.04 Timber management cutting and harvest-ing specifications. c1d PERMIT. cad *Permit issuance.* No person may cut or harvest timber within the riverway without a permit issued by the riverway board.

cbd *Permit conditions.* The riverway board shall place conditions in permits necessary to assure timber harvest or cutting is conducted in compliance with this chapter. Additional conditions, as applicable, shall be included but not be limited to:

1. Cutting specifications to insure that trees of desirable species and form be retained on the site after cutting.
2. Roads constructed for the purpose of harvesting timber shall be visually inconspicuous from the river during the time when the leaves are on the deciduous trees.
3. Timber cutting or harvesting is limited to those times when the ground is frozen or dry and the leaves are off the deciduous trees.
4. Erosion bars or culverts will be installed as necessary to prevent erosion.
5. Harvesting practices shall conform with the XSilvicultural and Forest Aesthetics HandbookY and the department publication XForest aesthetics.Y
6. Timber harvesting restrictions necessary to minimize the impact on any known populations of federally or state designated threatened and endangered species.

Note: The species are listed in ch. NR 27.

ccd *Maps or diagrams.* Landowners desiring to conduct any timber cutting or harvesting, including road construction shall submit a map or diagram of the proposed timber harvest area identifying the property boundaries, harvest boundaries, road locations and other information requested by the riverway board or county.

c2d BLUFF ZONE, RIVERVIEW ZONE AND RIVER EDGE ZONE. In addition to other restrictions established on timber cutting and harvest within the bluff zone, riverview zone and river edge zone, the following conditions shall be included but not be limited to:

cad No timber cutting or harvest may be conducted at any time other than when the ground is frozen or dry and the leaves are off the deciduous trees.

cbd Road construction for the purpose of harvesting or cutting timber on slopes facing the river shall comply with the following:

1. The permit authorizing the timber harvest and road construction.
2. The average grade may not exceed a 10% slope.
3. Grades up to but not exceeding 15% for no longer than 75 feet horizontal distance are authorized; however, grades with a slope of 10% to 15% may not constitute more than 20% of the road length.
4. Road width may not exceed 12 feet.
5. Switchbacks are not permitted on slopes facing the river. However, a variance may be granted allowing switchbacks or grades in excess of the limits established in subds. 2. and 3. in areas that would otherwise be inaccessible subject to the visually inconspicuous requirement of sub. c1d cbd 2. and the erosion protection requirement of sub. c1d cbd 4.

6. Roads, upon completion of the timber cutting and harvest operation, shall be seeded to establish sod or other vegetative cover.

Note: A mixture of seed including 10 pounds of white dutch clover, 5 pounds of perennial rye, 10 pounds of annual rye, and 15 pounds of creeping red fescue at a rate of 40 pounds per acre has proven effective. One mile of woods or timber road 12 feet wide will normally equal approximately 1.5 acres.

c4d BLUFF ZONE AND RIVER EDGE ZONE. No person may cut, harvest or remove timber within the bluff zone and river edge zone except by selection cutting. After cutting, the residual stand shall be at least 60 square feet basal area.

c5d RIVERVIEW ZONE. No person may cut, harvest or remove timber within the riverview zone except as follows:

cad By small regeneration cuts with boundaries designed to harmonize with naturally occurring shapes consistent with the XSilvicultural and Forest Aesthetic HandbookY and the publication XForest aesthetics;Y

cbd By shelterwood cuts not to exceed the size, shape, spacing or timing of regeneration cuts;

ccd By selection cutting leaving a residual timber stand of at least 60 square feet basal area.

c6d RESOURCE MANAGEMENT ZONE. Persons in the resource management zone are encouraged to conduct timber cutting, harvest or removal operations consistent with these rules and subch. IV of ch. 30, Stats. The harvest and harvest method should consider integration of all resource capabilities, including:

cad Cutting boundaries should be designed to harmonize with the natural occurring shapes in the area.

cbd Harvesting and thinning should be limited to when the ground is frozen or dry and the leaves are off the deciduous trees.

ccd Selection cutting, small regeneration cuts and shelterwood cuts are preferable harvesting techniques in this zone.

Note: Statutory exemptions to the timber cutting restrictions in this chapter. Chapter 30, subch. IV, of the Wisconsin Statutes provides various exemptions to timber cutting rules or restrictions. They do not apply to the cutting of timber if:

1. The landowner and the land involved is subject to a Forest Crop Law or Managed Forest Land Law by order or contract issued prior to October 31, 1989. cs. 30.42 c1d cfd and 30.44 c3d ccd, Stats.d
2. The cutting of timber is necessary for maintenance of an easement or a right-of-way for a high-voltage transmission line or a utility facility. cs. 30.44 c3d ccd 2m, Stats.d
3. The timber is diseased and a forester has issued a written determination that the timber is subject to an actual, potential or incipient infestation or infection by an insect or disease that is harmful to the timber. cs. 30.44 c3d ccd 2r, Stats.d
4. The timber has been damaged by natural causes. cs. 30.44 c3d ccd 3., Stats.d
5. The timber is on land more than 75 feet beyond the ordinary high-water mark of the river and the land is owned or occupied by the person cutting the timber for use as firewood for the person[s] agricultural or household use. cs. 30.44 c3d ccd 4., Stats.d

History: Cr. Register, November, 1990, No. 419, eff. 12-1-90; am. c1d cad and cbd cintro.d, c2d cintro.d and c4d, r. c3d, Register, December, 1997, No. 504, eff. 1-1-98.

NR 37.05 Variance. c1d The riverway board may grant a variance allowing timber cutting not in strict conformance with

the requirements and restrictions of this chapter when the activity will be visually inconspicuous and the activity will be compatible with protecting the scenic beauty and natural values of the riverway.

c2d The riverway board shall notify the department at least 15 days prior to granting any variance under this section and af-

ford the department an opportunity to address the riverway board. The riverway board shall also publish in the official state newspaper notice of a variance request and the date, time and place of the meeting at which the riverway board will consider the request.
