

Chapter NR 668

APPENDIX VI

RECOMMENDED TECHNOLOGIES TO ACHIEVE DEACTIVATION OF CHARACTERISTICS IN S. NR 668.42

The treatment standard for many characteristic wastes is stated in the s. NR 668.40 Table of Treatment Standards as XDeactivation and meet UTS.Y The department has determined that many technologies, when used alone or in combination, can achieve the deactivation portion of the treatment standard. Characteristic wastes that are not managed in a facility regulated by ch. 283, Stats., or in a CWA-equivalent facility, and that also contain underlying hazardous constituents csee s. NR 668.02 c9dd shall be treated not only by a XdeactivatingY technology to remove the characteristic, but also to

achieve the universal treatment standards cUTSd for underlying hazardous constituents. The following appendix presents a partial list of technologies, utilizing the 5 letter technology codes established in s. NR 668.42, Table 1, that may be useful in meeting the treatment standard. Use of these specific technologies is not mandatory and does not preclude direct reuse, recovery or the use of other pretreatment technologies, provided deactivation is achieved and underlying hazardous constituents are treated to achieve the UTS.

Waste code {subcategory	Nonwastewaters	Wastewaters
D001 Ignitable Liquids based on s. NR 661.0021 c1d cad-- Low TOC Nonwastewater Subcategory ccontaining 1% to <10% TOCd	RORGS INCIN WETOX CHOXD BIODG	n.a.
