1     **AN ACT to amend** 160.07 (2); and **to create** 160.05 (7) and 160.07 (4m) of the  
2             statutes; **relating to:** public notice and comment period for certain  
3             groundwater standards.

---

### *Analysis by the Legislative Reference Bureau*

Under current law, the Department of Natural Resources compiles a list of substances that are detected in or have a reasonable probability of entering the groundwater resources of this state; identifies which of these substances is of public health or welfare concern; and ranks the substances based on their risks to public health or welfare. DNR submits the list of substances identified as a public health concern to the Department of Health Services. DHS develops recommendations for enforcement standards for those substances, which DNR then incorporates into its rules.

Under this bill, DNR must provide public notice of the list of groundwater substances that it compiles, including by publishing such a list on its Internet site, and must include notice of the information and reasoning it used in compiling the list. DNR must also provide a 21-day public comment period to allow for comments on the substances included on the list. The bill also requires DHS, upon developing a recommended enforcement standard for a substance identified as a public health risk, to provide public notice and a 21-day public comment period on the proposed recommendation, and must provide notice of the information and reasoning it used in developing the recommendation, before submitting the recommendation to DNR.
