Referred to Committee on Mental Health, Substance Abuse Prevention, Children and Families.

AN ACT *to create* 46.48 (33) of the statutes; **relating to:** grants to mental health clubhouses.

Analysis by the Legislative Reference Bureau

This bill requires the Department of Health Services to award grants to clubhouses. A “clubhouse,” as defined in the bill, is a nonresidential rehabilitation program that provides support and services to individuals who have or are awaiting diagnosis for a mental illness but does not directly provide treatment or medical care for mental illnesses. To receive a grant, a clubhouse must include members who have been diagnosed with or are awaiting diagnosis for a mental illness and are under treatment for the condition, raise an amount of money itself to receive a matching grant, provide activities and services to members on a voluntary basis, have its own distinct physical space, and allow members to have the opportunity to participate in the administration and other operational functions of the clubhouse. The bill allows, if applicable, the Joint Committee on Finance to make a supplement using its passive review process for the purposes of providing grants to clubhouses.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
