1 **AN ACT to create** 217.12 of the statutes; **relating to:** virtual currency kiosks.

Analysis by the Legislative Reference Bureau

This bill requires a virtual currency kiosk operator to be licensed as a money transmitter and imposes certain regulatory requirements on virtual currency kiosk operators in addition to those that apply to money transmitters.

Under current law, the Division of Banking (division) in the Department of Financial Institutions regulates money transmitters. With exceptions, a person may not engage in the business of money transmission unless the person is licensed by the division. “Money transmission” means selling or issuing payment instruments or stored value, such as checks, money orders, or prepaid cards, to a person located in this state or receiving money for transmission from a person located in this state. “Money” is not defined to include virtual currency such as cryptocurrency.

Under the bill, a person may not engage in the business of operating virtual currency kiosks in this state unless the person is licensed by the division as a money transmitter. A “virtual currency kiosk” is defined as an electronic terminal or retail location, in this state, from which a person may exchange fiat currency (money) for virtual currency or virtual currency for money or other virtual currency. The bill requires a virtual currency kiosk operator to affix a specified printed warning to the front of each virtual currency kiosk and to electronically display this warning on the kiosk’s screen, which the customer must acknowledge to proceed with the transaction.

The bill also includes customer identification requirements. Before entering

into an initial transaction with an individual, a virtual currency kiosk operator must verify the individual's identity by collecting certain information, including the individual's full legal name, date of birth, and contact information, and obtaining a copy of the individual's driver's license, passport, or other government-issued identification document. In each transaction, the virtual currency kiosk operator must verify the customer's identity before accepting payment from or dispensing funds to the customer and take a photograph of the customer at the virtual currency kiosk.

The bill limits virtual currency kiosk transactions to \$1,000 per customer per day. The bill also limits the fees a virtual currency kiosk operator may charge a customer per transaction to the greater of \$5 or 3 percent of the transaction amount. A virtual currency kiosk operator must issue a refund to a customer, upon the customer's request, for the full amount of a transaction if 1) the customer was fraudulently induced to engage in the transaction and 2) within 30 days after the transaction, the customer contacted the virtual currency kiosk operator and a government or law enforcement agency to inform them of the fraudulent nature of the transaction.
