1 **AN ACT** *to create* 609.835 and 632.895 (16g) of the statutes; **relating to:** cost-
2 sharing caps on prescription drugs and medical supplies to treat asthma
3 under health insurance policies and plans.

Analysis by the Legislative Reference Bureau

This bill requires health insurance policies and plans that provide coverage of prescription drugs to cover prescription drugs and related medical supplies for the treatment of asthma. This bill provides that “related medical supplies” includes asthma inhalers and other medical supply items necessary to effectively and appropriately administer a prescription drug prescribed to treat asthma. This bill requires policies and plans to limit the amount of any enrollee cost-sharing for the coverage provided in the bill to no more than \$25 per one-month supply for each prescription drug prescribed to treat asthma and to no more than \$50 per month for all related medical supplies. Cost-sharing may not increase with the number of conditions for which an enrollee is treated. Further, the coverage provided in the bill may not be subject to any deductible. However, the bill provides that the limitations on cost-sharing and deductibles do not apply to the extent that the limitations would result in ineligibility for a health savings account under the federal Internal Revenue Code.

This proposal may contain a health insurance mandate requiring a social and financial impact report under s. 601.423, stats.
