***Analysis by the Legislative Reference Bureau***

This bill prohibits the Department of Health Services from imposing any utilization management controls for prescription drugs under the Medical Assistance program that are approved by the federal Food and Drug Administration and are classified as antipsychotic. Utilization management controls are formal techniques used by a health carrier or prescription drug utilization management entity that are designed to evaluate prescription drug medical necessity, appropriateness, efficacy, or efficiency. Currently, DHS administers the Medical Assistance program, which is a joint federal and state program that provides health services to individuals who have limited financial resources.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
