

JON PLUMER

STATE REPRESENTATIVE • 42nd ASSEMBLY DISTRICT

Assembly Bill 349, Assembly Committee on Agriculture

November 21, 2023

Thank you Representative Tranel and members of the Assembly Committee on Agriculture for your consideration of Assembly Bill 349.

I am certain many of my colleagues have seen news articles highlighting large land purchases by foreign nations all across the United States. One notable purchase is that of Chinese owned Fufeng Group, which federal authorities warned has deep ties to the Chinese Communist Party (CCP), purchasing 300 acres of land just twelve miles away from Grand Forks Air Force Base in North Dakota¹. Another incident involved a man named Sun Guangxin, who also maintains ties to the CCP, purchasing over 140,000 acres of land in Val Verde County, Texas since 2016. Val Verde County Texas happens to be home to Laughlin Air Force base². Furthermore, a corporation entitled Flannery Associates recently purchased 55,000 acres near Travis Air Force Base in Northern California. While an attorney representing the firm said that there are no foreign persons or group with any significant interest in Flannery, federal officials have been unable to independently verify that statement³. How can all of these large land purchases near strategic military installations be a coincidence?

In addition to these concerning reports of land purchases, various worldwide events including the COVID-19 pandemic, and wars in both Ukraine and Israel highlight flaws in the current state of our globalized economy and draw attention to America's increased dependency on foreign products and production. It is well past time that we limit the amount of agricultural land foreign governments can own in our state and ensure Wisconsin's agricultural bounties will be used to benefit Wisconsin residents.

Assembly Bill 349 reduces the number of allowed acres, extends applicability to foreign governments, transfers enforcement authority from DOJ to DATCP, and reduces the period of time for divestiture from four years to two years.

RE: Testimony on Assembly Bill 349

TO: Members of the Assembly Committee on Agriculture

FROM: Senator Rob Stafsholt

Thank you Chairman Tranel and members of the Assembly Committee on Agriculture for hearing Assembly Bill 349.

Agriculture is a major driver in Wisconsin's economy. According to DATCP, agriculture contributes over \$100 billion to the state's economy, while also providing hundreds of thousands of jobs. The industry is an immense source of pride for all Wisconsinites.

Over the last several years, foreign governments and companies have purchased large amounts of farmland around the country. These purchases have raised national security concerns, while also causing our domestic farmers to feel additional pressure from foreign investors moving in. Recent global events have also highlighted concerns from an increased dependence on foreign countries.

This bill addresses these concerns by prohibiting certain entities, including foreign corporations, foreign governments, and nonresident aliens, from owning more than 50 acres of agricultural and forestry land. The bill also changes enforcement authority from DOJ to DATCP, and reduces divestiture from four years to two years. It is also specified in the bill that this change would first apply to interests in land that are acquired on the first day of the month beginning after the bill is signed into law.

Again, thank you Chairman Tranel and members for allowing me to submit testimony on Assembly 349. I would also like to thank Representative Plumer for his work on this legislation. I would appreciate your support on this bill.

Testimony on 2023 Assembly Bill 349

Assembly Committee on Agriculture

November 21st, 2023

Thank you, Chair Tranel and Committee Members for the opportunity to testify today on 2023 Assembly Bill 349. The Wisconsin Farm Bureau strongly supports policies that keeps Wisconsin farmland in agricultural production, as well as policies that improve the security of our food supply chain and our overall national security. Unfortunately, Assembly Bill 349, as drafted, does not accomplish either of these objectives and in collective effect would result in a detriment to Wisconsin agriculture and several other major industries, most notably forestry products and paper production.

If the goal of this legislation is to better support farmers and Wisconsin's \$105 billion agricultural industry, the bill should not create broad prohibitions on friendly foreign individuals and companies interested in investing and advancing agriculture in Wisconsin. We have long standing farms throughout the state who have been farming here for decades but are not US citizens.

I have provided the committee with a printout of a spreadsheet dataset. This is the most recent Agricultural Foreign Investment Disclosure Act data (12/31/2021) from the United States Department of Agriculture (USDA) Farm Service Agency (FSA). The data is free to download and easily accessible on USDA's website, and I would be happy to provide it electronically as well. I've have added a general use code in the fourth column to identify more easily, to the best of my ability, the industry or use that the landowner (or lessee) is engaged in.

As you look through the data, you will see examples of German or Dutch nationals living and farming legally in Wisconsin. For quick reference, I've highlighted the ag use properties that hold greater than 50 acres in the state. There are 128 properties that would have been prohibited under the current draft of this legislation. These are either law abiding legal residents who pose no threat to our national security and strengthen our agricultural economy or are agribusinesses that are either partnerships or publicly traded companies whose investors include foreign entities.

Last month, I attended World Dairy Expo right here in Madison where we invite farmers and agribusinesses from around the world to gather to share innovations and seek business opportunities, because Wisconsin is a central player in global agriculture markets that I believe everyone here today wants to see succeed.

Under the data I've provided, there are a total of 143,000 acres of either crop, pasture or other agricultural land with an interest stake from a foreign entity. I was able to affirmatively identify 30,796.5 acres or 21.5% of this farmland has remained in some sort of agricultural use. However, this constitutes only about 5.6% of the total foreign-interested land in Wisconsin. This land had a

median acquisition year of 1997, with the most recent being a 60-acre parcel purchased by a French cheese maker in 2019, who was crowned as a grand master cheese maker for his blueberry vanilla flavored goat cheese.

Wisconsin Farm Bureau would support this legislation were it to include an agricultural use and research exemption to allow continued investment in agriculture from some of our nation's biggest trading partners and those looking to come to the United States and establish farms, right here in Wisconsin.

What I can discern you've probably started notice from reviewing this data is the number of times energy generation companies are listed, so I've provided a bit of analysis for you on this. Of the 143,000 acres of foreign-interested ag land, 92,335.3 acres are either owned or leased by a foreign-owned energy generation company. This is more than 64% of the foreign-interested acres of Wisconsin farmland and these parcels have a median acquisition date of 2019.

This is quite frankly a shocking number in my opinion. Everyone on this committee has seen the explosion of solar generation in Wisconsin and not much has stood in the way of its proliferation and fewer proposals have attempted to adequately account for the impacts to agriculture that this has and will have.

Thankfully, this legislation does rightly stop the bleeding of the uncontrolled loss of prime farmland to foreign-owned companies. By eliminating a use exemption for electric generation in sections 8 and 9 of the bill, foreign-owned businesses would be subjected to the same 50 acre limitation for acquiring new land that our friend the French cheese maker would be. While the repeal of these exemptions would further impact mining, manufacturing, construction, transportation, retail trades and services, the threat to American farmland posed by foreign entities is burgeoning most explicitly in energy generation.

We have lost enough prime farmland in Wisconsin to foreign entities looking to garner control of U.S. energy production. Wisconsin Farm Bureau would be highly unlikely to support any proposal that would reestablish or uphold an exemption for foreign-owned entities to acquire uncontrolled swaths of Wisconsin farmland for predominantly solar energy generation and we applaud the authors and co-sponsors of the bill for their firm stance on this particular issue.

While the nexus of this legislation is mostly a concern about foreign adversaries buying farmland to inhibit the national security of the United States, the reality of the data available is that these circumstances are either nonexistent or have been limited to a few occasions in other states and would most likely still occur covertly even if this bill were to become law. While I share the concern of the authors in this matter and would welcome greater transparency on land acquisitions, the reality of the unintended impacts from the legislation before us poses an equal threat to the legacy industries and businesses already here and operating in Wisconsin.

Without significant modifications and amendments, Assembly Bill 349 does not achieve its intended goal of keeping Wisconsinites safe and supporting farmers and our state's agricultural industry, we ask that this legislation be amended to meet the concerns of the industry stakeholders registered in opposition to the bill and look forward to further discussions.

To: Assembly Committee on Agriculture
From: Cori Lamont, Senior Director of Legal and Public Affairs
Date: November 21, 2023
RE: AB 349/SB 348: Limitations on Ownership of Agricultural or Forestry Land by Foreign Persons

The WRA opposes AB 349/SB 348 legislation limiting the ownership of agricultural or forestry land by foreign persons due to the potential Fair Housing violation and lack of liability protection for REALTORS®, title companies, lenders and others associated with a real estate transaction.

Background

Current law adopted originally in 1887 prohibits foreign persons and corporations from owning more than 640 acres of land, unless one of the exceptions is satisfied (mining exploration, manufacturing, oil/gas exploration, etc.). The proposal of AB 349 to reduce the amount of agricultural or forestry land permitted to be owned by a foreign person from 640 to 50 acres raises several concerns.

Potential Fair Housing violation

While there is a national trend to restrict foreign ownership of agricultural land for national security reasons, the discussion presents different challenges for real estate professionals.

The Fair Housing Act, 42 U.S.C. 3601, passed in 1968 prohibits discrimination in the sale, rental and financing of dwellings and other housing-related transactions, based on race, color, national origin, religion, sex, familial status, and disability.

Therefore, per federal law REALTORS® and other providers such as title representatives and lenders in the real estate transaction are not permitted to ask the buyer their national origin status. This begs the question - who will ask the buyer for this information if not one of these participants in the transaction?

Lack of liability protection

Since the Fair Housing Act disallows REALTORS®, title companies, lenders, and others to discriminate based upon someone's national origin, who is responsible for asking the buyer about their status?

As proposed, the bill would obligate one or more of these professions to violate the Fair Housing Act. Additionally, the proposed bill offers no liability protection for REALTORS®, title companies, lenders, etc. when making this request. Furthermore, even if the bill did offer a safe harbor for these professionals, it is unlikely Wisconsin law can create a protection for violation of a federal law.

Wisconsin law currently prohibits U.S. and foreign corporations from owning farmland

Wisconsin law specifically prohibits U.S. and foreign corporations from owning farmland if the corporation has more than 15 shareholders and meets several other requirements. See Wis. Stat. § 182.001. Because it does not treat foreign corporations differently than U.S. corporations, Wis. Stat. § 182.001 does not violate the federal GATS Treaty and thus can be enforced to prohibit these foreign and domestic corporations from owning farmland.

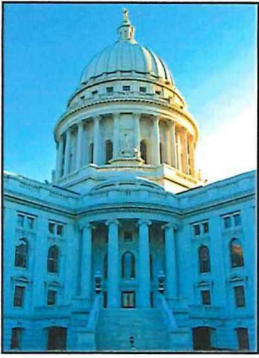

Other proposed legislation does not violate the Fair Housing Act

In contrast to AB 349, the WRA is neutral on AB 269/SB 264, legislation prohibiting foreign adversaries from acquiring any agricultural or forestry land. Per AB 269, "Foreign adversary" is defined as foreign government or nongovernment person determined by federal dept. of commerce to be a national security threat. "Foreign adversary" is not protected under the Fair Housing Act.

Question of Constitutionality

In states, such as Florida that recently adopted a restriction on the ownership and purchase of real property based on race, ethnicity, alienage, and national origin legal challenges contend that the state law is preempted by federal law and violates the Supremacy Clause of the U.S. Constitution. Opponents of the law argue that the state law is usurping the power vested in the federal government in the Supremacy Clause by regulating foreign affairs, national security and foreign investment.

For the reasons above, the WRA does not support AB 349/SB 348.

Assembly Committee on Agriculture November 21, 2023

Testimony of Amy Winters, Contract lobbyist for CropLife America on AB 349, relating to limitations on ownership of agriculture or forestry land by foreign persons.

Chairman Tranel, members of the committee, thank you for the opportunity to provide comments on Assembly Bill 349. My Client CropLife America is opposed to this bill as currently written and asks for modifications to protect agricultural research and development.

CLA's member companies produce, sell, and distribute virtually all the vital and necessary crop protection and biotechnology products used by farmers, ranchers and landowners. CropLife America's member companies ensure growers and consumers have the technologies they need to protect crops, communities, and ecosystems from the threat of pests, weeds, and diseases.

Our industry does not oppose limitations on foreign ownership of land; however, we are opposed to the language in this bill that would severely limit, or completely restrict, some of our member companies from continuing to conduct research - to provide needed tools and resources to Wisconsin Farmers. AB 349 is also significantly more restrictive than other states in the Midwest such as Iowa, Indiana, and North Dakota that also have limitations on foreign ownership and provide exemptions for agricultural research and development.

Federal regulations require that extensive testing is done on crop protection products. Evaluated under field conditions, pesticides are tested to examine how pests and plants respond to the pesticide application and the timing and dose of the pesticide application. Through this process, EPA helps ensure that each pesticide will perform its intended function without unintended effects on human health, non-target species or the environment. Crop protection and crop inputs are some of the most highly regulated products and their development contributes billions of dollars into the American economy. Without these tools, our farmers would not have the ability to produce and innovate, to feed our growing population. It is also this research that has allowed the industry to become much more sustainable and that trend continues each year.

CropLife member companies, Syngenta and Bayer, are two examples of companies that are leaders in the industry. Both of these companies are foreign owned and both own/lease between 100-200 acres of agricultural research land in Wisconsin. They employ over 100 people combined. Bayer's Seminis facility in DeForest conducts vegetable research to advance breeding technology, and Syngenta's site in Janesville focuses on seed research. It is important for these companies to conduct their field research where the crops are/will be grown. Climate, soil types, topography, etc. are factors that are required for development research and field trials. As written AB 349 would force them to leave Wisconsin, and with them, their valuable research and economic inputs to the state.

There are many challenges in modern agriculture including water quantity and quality, soil erosion and soil types, weeds, need for increased yields, consumer demands, economic factors, environmental sustainability, etc. It is imperative that we do not limit our ability to innovate, evolve and adapt to these challenges.

We request that the number of acres in the bill be increased to no less than 320 acres (half of the current law), the language grandfather in any existing agricultural land held by foreign persons for research and development of agricultural inputs, and an exemption for land that is used for agricultural research and development of crop protection inputs for sale or resale to farmers. This includes the right to lease or purchase land for experimental purposes; including testing, developing, and/or producing all crop production inputs, including, but not limited to seeds, plants, pesticides, soil amendments, biologicals, and fertilizers.

Thank you for your time and consideration.

To: Honorable Members of the Assembly Committee on Agriculture
From: Scott Suder, President
Wisconsin Paper Council
Re: Written Testimony Regarding Assembly Bill 349
Date: November 21, 2023

Thank you, Chairman Tranel and honorable Members of the Assembly Ag Committee for the opportunity to submit written testimony for today's public hearing from the Wisconsin Paper Council (WPC) on behalf of our trade association's statewide membership. My name is Scott Suder and I'm the President and CEO of the WPC.

As you may know, WPC is the premier trade association in Wisconsin that advocates for the papermaking industry before regulatory bodies, and state and federal legislatures to achieve positive policy outcomes. WPC also works to educate the public about the social, environmental, and economic importance of paper, pulp, and forestry production in Wisconsin and throughout the Midwest.

Wisconsin's forest products industry provides good paying, highly technological jobs to nearly 64,000 workers and contributing over \$24 billion to manufacturing output in the state. The pulp and paper sector alone employs over 30,000 people in Wisconsin and has an annual payroll of \$2.5 billion. Our industries supply national markets and drive over \$1 billion of exports to over 100 countries worldwide.

Wisconsin holds the proud title of being the #1 paper-producing state in the United States, with the output of paper manufactured products estimated to be over \$18 billion.

A number of our member companies have some concerns about the impact of Assembly Bill 349 on their current and future operations. Many of our member companies operate under foreign ownership from countries such as Finland, France, Brazil, Germany, Sweden, Italy, Norway, Canada and Mexico – just to name a few.

Our companies own varying amounts of own or lease agriculture and forest lands throughout our state for a wide variety of purposes such as forest cropland, critical infrastructure easements, landfill operations and research development.

Limiting the ability of our companies to expand their operations by limiting their ability to purchase ag or forest lands for feedstock, renewable energy credit parcels for solar or wind farms, easement necessity or even research and development seems both counterintuitive and counterproductive.

We urge this committee to consider amending this legislation to target “foreign adversaries” as defined by several federal agencies including the Department of Homeland Security, the Department of Commerce and the Department Energy.

‘**Foreign adversaries**’ are generally defined as any foreign government or foreign nongovernment person engaged in a long-term pattern or serious instance of conduct significantly adverse to the national security of the U.S. or its allies or the security and safety of U.S. persons.

Countries such Iran, North Korea, Russia, Yemen, Syria and Russia should perhaps be limited in terms of land acquisition, particularly near sensitive infrastructure such as military bases and power plants.

However, we do not believe that our NATO allies of France, Finland and Canada are engaged in such nefarious conduct and hence pose any short or long-term threats to either Wisconsin’s security.

Although I might argue that the cuisines of Lutefisk and escargot may a threat to our taste buds, their country of origin are, nonetheless, our allies.

Our manufacturing industry, like many others, is globally competitive. As such, we need to allow for our companies to be in the strongest position to compete. The purchase of agriculture and/or forestry lands by our companies signals stability for our industries future, not a national security threat.

We urge you to seriously consider amending this legislation in a manner which protects our vital national security interests without stifling competition, research or future industry progress.

Thank you for your time today and I would be happy to answer any questions you may have.

State of Wisconsin
Governor Tony Evers

Department of Agriculture, Trade and Consumer Protection
Secretary Randy Romanski

RE: Assembly Bill 349 Relating to: limitations on ownership of agricultural or forestry land in this state by foreign persons

November 21, 2023

Chairman Tranel and members of the Assembly Committee on Agriculture:

Thank you for the opportunity to provide information regarding Assembly Bill 349 related to limiting the amount of agriculture or forestry land in Wisconsin that can be owned by a foreign person.

Assembly Bill 349 prohibits certain foreign persons from acquiring more than 50 acres of agricultural or forestry land in Wisconsin. The bill would also repeal the ability of certain foreign persons from exceeding the limit if the land were leased to a non-foreign person for agricultural or forestry use. The 50-acre limitation applies only to land classified as agriculture, agricultural forest, or productive forest land for property tax purposes. The bill shifts enforcement authority from the Attorney General and transfers it to the Department of Agriculture, Trade and Consumer Protection (DATCP). Assembly Bill 349 adds foreign governments to the acreage ownership limit. The bill reduces the time a foreign person must divest themselves of land exceeding the limit in the state from four years under current law to two years. The bill would not impact current foreign landowners but those who purchase Wisconsin agriculture or forestry land after the first day of the first month beginning after the effective date of the bill.

Under current law, the limitation on foreign ownership of agricultural or forestry cannot exceed 640 acres. Foreign entities are required to report to the United States Department of Agriculture (USDA) any acquisition or interest in agricultural land under the Agricultural Foreign Investment Disclosure Act. The Agricultural Foreign Investment Disclosure Act of 1978 (AFIDA; P.L. 95-460, 7 U.S.C. §§3501-3508) and its federal regulations (7 C.F.R. Part 781), implemented by USDA, established a nationwide system for the collection of information pertaining to foreign ownership of U.S. agricultural land (as defined at 7 C.F.R. §781.2) This information is shared with the state annually. State law requires these foreign entities to report to DATCP, as well as the USDA.

The Department's most recent Nonresident Aliens and Corporation Land Report was shared with the Legislature on February 10, 2023. If you would like a copy of the report, please reach out to us.

DATCP does not have the resources to implement the enforcement provisions of Assembly 349 if enacted. If the department became aware of a foreign entity prohibited from owning more than 50 acres of agricultural or forestry land acquiring ownership, we would work with the Department of Justice to enforce the provisions of Assembly Bill 349.

Thank you for the opportunity to provide information on Assembly Bill 349.

To: Honorable Members of the State Assembly

Subject – Assembly Bill 349 Related to the Limitation of Foreign Ownership of Agricultural and Forested Lands

State Assembly Members,

The Outagamie County Land Conservation Committee drafted the attached resolution, Resolution 147-2022-23, which was in-turn voted on and unanimously passed by the Outagamie County Board on March 14th, 2023 which requests that the State of Wisconsin to respectfully review and revise its policy on the foreign ownership of Agricultural lands in the State.

Recent world events such as the COVID Pandemic reinforce that food security and supply chain independence are vital to help protect the health and safety of our citizens. Ownership by foreign entities that may have adverse impacts on this supply chain due to impacts by adversarial governments or entities party to adversarial governments are a real and relevant threat.

We strongly support proposed Assembly Bill 349 and encourage support by the Assembly.

Respectfully Submitted,

Debbie VanderHeiden – Outagamie County LCC Chair

Resolution No. 147—2022-23 – Agriculture, Extension Education, Zoning & Land Conservation Committee. Respectfully request that the State of Wisconsin, in the next legislative biennium, review and revise its policy on foreign ownership of farmland.

Supervisor Konetzke moved, seconded by Supervisor Spears, for adoption.

ROLL CALL: 32 yes, 3 absent, 1 vacant. RESOLUTION NO. 147—2022-23 IS ADOPTED.
