PART I

KEY PROVISIONS OF COMMITTEE RECOMMENDATIONS

The Joint Legislative Council recommends the following for introduction in the 2013-14 Session of the Legislature.

2013 ASSEMBLY BILL 97, RELATING TO THE CREATION OF A STATE 911 COUNCIL

The bill does the following:

- Creates a council to advise and direct the Office of Justice Assistance (OJA) and the Public Service Commission (PSC) on the administration of 911 telecommunications services and grant programs available to promote those services.
- Outlines the membership of the council, which includes entities involved in various aspects of 911 telecommunications and emergency response issues.
- Outlines the duties of the council.
- Authorizes the creation of, and funding for, a 911 telecommunications service coordinator within OJA.

2013 ASSEMBLY BILL 98, RELATING TO CALLS TO 911 MADE FROM MULTILINE TELEPHONE SYSTEMS

The bill requires the following of owners and operators of multiline telephone systems:

- Creates a requirement that an owner or operator of a multiline telephone system design and maintain the system to provide location and callback information to a public safety answering point (PSAP) when a call to “911” is made.
- Imposes a requirement that every owner or operator of a multiline telephone system instruct each user of the system as to how to call for emergency assistance from a telephone in the system.

2013 ASSEMBLY BILL 99, RELATING TO FUNDING FOR THE STATE 911 TELECOMMUNICATIONS SYSTEM AND GRANTING RULE-MAKING AUTHORITY

The bill makes the following changes to the distribution and imposition of telecommunications service fees:

- Directs that any revenue generated annually by the police and fire protection fee in excess of the average of revenue generated by this fee during the 2010-11 and 2011-12 fiscal years, is to be appropriated for the state 911 grant program.

- Applies the countywide 911 telecommunications service fee statewide on all active communications service connections (voice or nonvoice) capable of accessing a public safety answering point.

2013 ASSEMBLY BILL 100, RELATING TO THE STATE 911 GRANT PROGRAM

The bill does the following:

- Creates the state 911 grant program.
- Directs the state 911 council to establish, and the OJA to promulgate by rule, eligibility criteria and purposes for grants to be provided to PSAPs.

2013 ASSEMBLY BILL 101, RELATING TO STATE 911 TELECOMMUNICATIONS SERVICES AND MAKING AN APPROPRIATION

The bill creates the following 911 telecommunications services contracting mechanism:

- Requires the PSC to contract with a network of 911 telecommunications services providers to perform functions related to state 911 telecommunications services.
- Requires communications providers to provide price schedules for 911 telecommunications services to the PSC, requires the PSC to review the price schedules to determine whether they are commercially reasonable, and requires the PSC to reimburse the commercially reasonable costs the providers incur.
- Creates a staff position at the PSC to perform these functions and allows the PSC to pay its administrative expenses from the state 911 fee, within enumerated limits.

2013 ASSEMBLY BILL 102, RELATING TO TELECOMMUNICATION SUBSCRIBER RECORDS, PROPRIETARY INFORMATION OF CERTAIN COMMUNICATIONS PROVIDERS, AND UPDATES TO CERTAIN 911 TELECOMMUNICATIONS SERVICE DATABASES

The bill provides for the treatment of telecommunications subscriber records in the following manner:

- Allows communications providers to designate information provided to OJA or the PSC as “proprietary information,” and provides for the exemption of that information and subscriber records from inspection or copying under the state’s open records law.
- Requires 911 telecommunications services providers, communications providers, and PSAPs to take action to update the master street address guide and automatic location identification databases within specified time periods.

OTHER RECOMMENDATION

At its December 13, 2012 meeting, the committee directed Legislative Council staff to draft a letter to the Joint Committee on Finance expressing disagreement with the current disposition of revenue received from collection of the police and fire protection fee. The committee further directed that the letter express the committee's desire that the fee be repurposed for 911 funding or eliminated, or that the revenue from the fee be distributed in a way that is more consistent with consumer expectations.

PART II

COMMITTEE ACTIVITY

ASSIGNMENT

The Joint Legislative Council established the Special Committee on 911 Communications and appointed the chairperson by an April 24, 2012 mail ballot. The committee was directed to review 911 public safety communications in Wisconsin and develop legislation as needed to strengthen and improve the system. The Special Committee was directed to study: (a) creation of a statewide entity to provide coordination and long-term planning for the system; (b) existing funding sources and projected costs of the system; (c) the training curriculum and requirements for 911 dispatch personnel; (d) establishment of a minimum 911 service standard; (e) methods to upgrade multi-line telephone system technology to enable responders to locate calls originating from large or multi-location facilities; and (f) best practices around the country for potential implementation in Wisconsin.

Membership of the Special Committee, appointed by a May 31, 2012 mail ballot, consisted of two Senators, two Representatives, and 12 public members. The final list of committee members is included as Appendix 3 to this report.

SUMMARY OF MEETINGS

The Special Committee held five meetings on the following dates:

July 19, 2012
August 16, 2012
September 27, 2012
October 25, 2012
December 13, 2012

At the July 19, 2012 meeting, Trey Forgety, Director of Governmental Affairs, National Emergency Number Association, provided information relating to the history of 911 communication and described the progression of the technology to date and moving forward. Mr. Forgety also described issues that the committee should consider when making recommendations.

Dennis Klaila of the PSC noted the separate state funding mechanisms for land line and wireless 911 in Wisconsin, and described their histories. He spoke to the history of 911 funding and the current state of the funding mechanisms in place for this purpose, and offered input into issues relating to converting the current system to a different funding approach.

Deborah Wilichowski of the Milwaukee Fire Department described the department's next generation capable, internet protocol-based 911 system and discussed issues faced by PSAPs relating to cellular telephones that can access 911 but are not subscribed to an actual account.

At the August 16 meeting, a panel on 911 communicator training consisting of Mark Brown, Dean of Public Safety, Blackhawk Technical College, Janesville; Kelly Zenz, Dispatch Manager, Wood County Dispatch Center, Wisconsin Rapids; and Bob Currier, North-Central Director, National Emergency Number Association, Charlotte, Michigan, spoke to the committee about the National Emergency Number Association and shared information about important considerations related to 911 telecommunicator training. The panel discussed funding needs for PSAPs, efforts to create 911 telecommunicator training programs in the technical college system, and opportunities for shared curriculum across multiple locations. There was further discussion of training and operations methods used in other states and issues related to geographic information systems (GIS) that counties and other PSAPs may face.

At the September 27, 2012 meeting, Pamela Hollick, Vice President of Regulatory, tw telecom, discussed the current funding mechanism for 911 communications, suggested improvements in the funding mechanism, and the need for technological neutrality in any future funding mechanism.

Committee members discussed a 2008-09 legislative proposal to fund 911 communications, the progress made at that time, and the state of the proposed legislation at the conclusion of that effort. Members also discussed the creation of a statewide funding mechanism and explored the current funding situation.

The committee discussed reallocating part of the revenues from the existing police and fire protection fee to support training for 911 telecommunicators and other aspects of 911 service.

At the October 25, 2012 meeting, Dr. Steven Zils, Out-of-Hospital Medical Director, Aurora Medical Center, made a presentation to the committee about Emergency Medical Dispatch (EMD), and members discussed their experiences with EMD.

Patrick Fucik, Director, Western Region - Sprint State Government Affairs, and Michael McDermott, Midwest Executive Director of Public Policy, Verizon Wireless, recommended that the committee propose a 911 funding system paid for by a surcharge on all types of telecommunications technologies and noted that central collection of this type of fee, at the state level, would be preferable to existing fee structures.

John Murray, Executive Director, OJA, provided the committee with a report on the history and functions of the OJA, with particular attention paid to the Interoperability Council and its Interoperable Communications Standards Group.

At the December 13, 2012 meeting, the committee discussed proposed legislation that was suggested by the committee at the October 25, 2012 meeting and prepared by Legislative Council staff. Legislative Council staff described the six proposed drafts, and committee members discussed each and made suggestions for modifications to the drafts.

The committee voted to have Legislative Council staff prepare the drafts with the suggested changes for submission to the committee by mail ballot, along with a letter to the Joint Committee on Finance expressing the committee's displeasure with the current police and fire protection fee.

PART III

RECOMMENDATIONS INTRODUCED BY THE JOINT LEGISLATIVE COUNCIL

This Part of the report provides background information on, and a description of, the bills as recommended by the Special Committee on 911 Communications and introduced by the Joint Legislative Council.

ASSEMBLY BILL 97, RELATING TO THE CREATION OF A STATE 911 COUNCIL

Background

The provision of 911 services is currently administered at the local level, with each PSAP operating under the direction of county or municipal authorities. Coordination among PSAPs, where present, is largely facilitated through professional organizations and ad hoc agreements. Funding is provided by a combination of fees paid by users of landline telephone service and moneys appropriated by local units of government.

Description

The bill creates a council to advise and direct the OJA and the PSC on the administration of 911 telecommunications services and grant programs available to promote those services. It outlines the membership and duties of the council and authorizes the creation of a 911 telecommunications service coordinator within OJA, to be funded from the service fees established in the bill.

ASSEMBLY BILL 98, RELATING TO CALLS TO 911 MADE FROM MULTILINE TELEPHONE SYSTEMS

Background

The committee heard testimony on the difficulties that can arise for emergency service providers responding to facilities serviced by multiline telephone systems. Many phone systems do not provide an exact location from which the call originated, and in some instances provide locations a considerable distance from the site of the actual emergency. These systems may also not provide a callback number for a PSAP to use if a 911 call is disconnected. This may result in emergency services being dispatched to a billing location of a business when the emergency is in a different location.

Description

Assembly Bill 98 creates a requirement that an owner or operator of a multiline telephone system design and maintain the system to provide location and callback information to a PSAP when a call to “911” is made, with exceptions. It further imposes a requirement that every owner or operator of a multiline telephone system instruct each user of the system as to how to call for emergency assistance from a telephone in the system.

ASSEMBLY BILL 99, RELATING TO FUNDING FOR THE STATE 911 TELECOMMUNICATIONS SYSTEM AND GRANTING RULE-MAKING AUTHORITY

Background

Funding for 911 services is provided by a combination of local government funding and revenues from a service fee imposed upon landline telephone service that is capped by statute and limited in its permissible uses. There exists a police and fire protection fee assessed on both landline and cellular telephone bills that generates revenue that is directed to the general fund. Committee members expressed dissatisfaction with the use of these fees, originally intended for 911 system improvements to augment the general fund.

Description

The bill directs that any revenue generated annually by the police and fire protection fee in excess of the average of revenue generated by this fee during the 2010-11 and 2011-12 fiscal years be appropriated for state 911 grants. It further applies the countywide 911 telecommunications service fee statewide on all active communications service connections (voice or nonvoice) capable of accessing a public safety answering point.

ASSEMBLY BILL 100, RELATING TO THE STATE 911 GRANT PROGRAM

Background

There is currently no statewide grant program for support of 911 services.

Description

Assembly Bill 100 creates the state 911 grant program, funded from revenues generated under the statewide 911 fee and part of the police and fire protection fee, as provided in the bill. It also directs the state 911 council to establish, and the OJA to promulgate by rule, eligibility criteria and purposes for grants to be provided to PSAPs.

ASSEMBLY BILL 101, RELATING TO STATE 911 TELECOMMUNICATIONS SERVICES AND MAKING AN APPROPRIATION

Background

Currently, PSAPs contract with communications providers to perform functions related to 911 service. Wisconsin statutes provide for a mechanism by which counties can authorize the provider to add a surcharge onto landline telephone service bills and keep the revenue to pay for these functions. In some instances, the authorized surcharge amount is sufficient to pay for the services. In counties with a smaller number of active landlines, the surcharge may not fully cover the expense. With a decrease in the number of landline telephones in service, this deficit is growing in some areas.

Description

The bill requires communications providers to provide price schedules for 911 telecommunications services provided to their customers, requires the PSC to pay the communications providers for these costs, to the extent that they are commercially reasonable. The PSC is also required to contract with a network of 911 telecommunications service providers to perform functions related to state 911 telecommunications services. The bill also creates a staff position at the PSC to perform these functions and allows the PSC to pay its administrative expenses from the state 911 fee, within enumerated limits.

ASSEMBLY BILL 102, RELATING TO TELECOMMUNICATION SUBSCRIBER RECORDS, PROPRIETARY INFORMATION OF CERTAIN COMMUNICATIONS PROVIDERS, AND UPDATES TO CERTAIN 911 TELECOMMUNICATIONS SERVICE DATABASES

Background

In order to facilitate the provision of 911 telecommunications services statewide under the committee's proposed legislation, communications providers will need to provide information to the OJA and PSC. Some of the necessary information would include information about subscribers and proprietary information, which could be subject to disclosure under ss. 19.31 to 19.39, Stats., the Wisconsin public records law. The committee determined that it was appropriate to exempt these records from this law.

The committee also discussed difficulties in providing emergency services in instances where telephone records are not promptly updated to reflect new accounts or the relocation of existing accounts.

Description

Assembly Bill 102 allows communications providers to designate information provided the OJA or PSC as "proprietary information," and provides for the exemption of that information and subscriber records from inspection or copying under the state's open records law.

The bill also requires 911 telecommunications service providers, communications providers, and PSAPs to take action to update the master street address guide and automatic location identification database within specified time periods.

COMMITTEE AND JOINT LEGISLATIVE COUNCIL VOTES

The following drafts were recommended by the Special Committee on 911 Communications.

SPECIAL COMMITTEE VOTE

The Special Committee voted by a January 23, 2013 mail ballot, to recommend the following six bill drafts to the Joint Legislative Council for introduction in the 2013-14 Session of the Legislature. The votes on the drafts were as follows:

- LRB-0919/1, relating to the creation of a state 911 council, passed by a vote of Ayes, 16 (Reps. Ballweg and Vruwink; Sens. Jauch and Moulton; and Public Members Backus, Bychinski, Froiland, Jermain, Kesler, Landers, McInnis, Nehls, Ranous, Sanfelipo, Tuma, and Welp); Noes, 0; and Not Voting, 0.
- LRB-0920/1, relating to calls to 911 made from multiline telephone systems, passed by a vote of Ayes, 15 (Reps. Ballweg and Vruwink; Sen. Jauch; and Public Members Backus, Bychinski, Froiland, Jermain, Kesler, Landers, McInnis, Nehls, Ranous, Sanfelipo, Tuma, and Welp); Noes, 1 (Sen. Moulton); and Not Voting, 0.
- LRB-0921/1, relating to funding for the state 911 telecommunications system, passed by a vote of Ayes, 13 (Reps. Ballweg and Vruwink; Sens. Jauch and Moulton; and Public Members Backus, Bychinski, Froiland, Kesler, Landers, McInnis, Nehls, Ranous, and Tuma); Noes, 3 (Public Members Jermain, Sanfelipo, and Welp); and Not Voting, 0.
- LRB-0922/2, relating to the state 911 grant program, passed by a vote of Ayes, 16 (Reps. Ballweg and Vruwink; Sens. Jauch and Moulton; and Public Members Backus, Bychinski, Froiland, Jermain, Kesler, Landers, McInnis, Nehls, Ranous, Sanfelipo, Tuma, and Welp); Noes, 0; and Not Voting, 0.
- LRB-0923/1, relating to state 911 telecommunications services, passed by a vote of Ayes, 16 (Reps. Ballweg and Vruwink; Sens. Jauch and Moulton; and Public Members Backus, Bychinski, Froiland, Jermain, Kesler, Landers, McInnis, Nehls, Ranous, Sanfelipo, Tuma, and Welp); Noes, 0; and Not Voting, 0.
- LRB-0924/1, relating to telecommunication subscriber records, proprietary information of certain communications providers, and

updates to certain 911 telecommunications service databases, passed by a vote of Ayes, 16 (Reps. Ballweg and Vruwink; Sens. Jauch and Moulton; and Public Members Backus, Bychinski, Froiland, Jermain, Kesler, Landers, McInnis, Nehls, Ranous, Sanfelipo, Tuma, and Welp); Noes, 0; and Not Voting, 0.

- Letter to the Co-Chairs of the Joint Committee on Finance regarding the police and fire protection fee, passed by a vote of Ayes, 16 (Reps. Ballweg and Vruwink; Sens. Jauch and Moulton; and Public Members Backus, Bychinski, Froiland, Jermain, Kesler, Landers, McInnis, Nehls, Ranous, Sanfelipo, Tuma, and Welp); Noes, 0; and Not Voting, 0.

JOINT LEGISLATIVE COUNCIL VOTE

At its February 13, 2013 meeting, the Joint Legislative Council voted as follows on the recommendations of the Special Committee:

Sen. Risser moved, seconded by Sen. Schultz, that LRB-0919/1, LRB-0920/1, LRB-0922/1, LRB-0923/1 and LRB-0924/1, be introduced by the Joint Legislative Council. The motion passed on a roll call vote as follows: Ayes, 15 (Sens. Olsen, Fitzgerald, Larson, Leibham, Miller, Risser, Shilling, and Schultz; and Reps. Ballweg, Barca, Berceau, Loudenbeck, Mason, Pasch, and Stone); Noes, 6 (Sens. Darling, Farrow, and Petrowski; and Reps. Kramer, Nygren, and Suder); and Not Voting, 1 (Rep. Vos).

Sen. Risser moved, seconded by Sen. Schultz, that LRB-0921/1, be introduced by the Joint Legislative Council. The motion passed on a roll call vote as follows: Ayes, 13 (Sens. Olsen, Fitzgerald, Larson, Miller, Risser, Shilling, and Schultz; and Reps. Ballweg, Barca, Berceau, Mason, Pasch, and Vos); and Noes, 9 (Sens. Darling, Farrow, Leibham, and Petrowski; and Reps. Kramer, Loudenbeck, Nygren, Stone, and Suder).

Representative John Nygren, Co-Chair
Joint Committee on Finance
Room 309 East
State Capitol

Dear Senator Darling and Representative Nygren:

The Special Committee on 911 Communications was created by the Joint Legislative Council to study various aspects of 911 public safety communications in Wisconsin and develop legislation as needed to strengthen and improve the system. In particular, the Special Committee was directed to study existing funding sources and projected costs of the system, among other factors.

Membership of the committee included individuals with a wide range of backgrounds including local government, 911 center operations, telecommunications, health advocacy and health care, and law enforcement. The Special Committee held five meetings over six months at which it reviewed research provided by Special Committee staff and others, heard from a variety of invited speakers and experts, and debated the current status and future direction of the 911 system in this state.

A recurring theme during the Special Committee's work was the dissatisfaction of the Special Committee members with the current police and fire protection fee. This fee was originally proposed to specifically fund ongoing 911 services in Wisconsin. However, the revenue from this fee has not been used for this purpose. Instead, because of a state budget deficit, all revenue from this fee has been deposited into the state's general fund. The Special Committee supports the imposition of a uniform statewide 911 user fee on all communications users. However, the Special Committee does not support the continued imposition of a police and fire protection fee aimed at collecting general revenue for the state *and* a separate statewide 911 user fee.

Supporting Effective Lawmaking Since 1947

One East Main Street, Suite 401 • P.O. Box 2536 • Madison, WI 53701-2536
(608) 266-1304 • Fax: (608) 266-3830 • Email: leg.council@legis.wisconsin.gov

The Special Committee respectfully requests that you take action to eliminate the police and fire protection fee in favor of the Special Committee's recommendation to establish a uniform statewide 911 user fee on all communications users. Alternatively, the police and fire protection fee could be repurposed to support 911 service in Wisconsin, as originally intended. If this option is chosen, the current landline 911 user fee should also be eliminated. A more detailed account of the history of the police and fire protection fee is provided in the following paragraphs.

Beginning in 2007, a diverse group of interests concerned with 911 service and funding in Wisconsin got together to explore options to improve the 911 system. The culmination of their efforts was a comprehensive proposal to improve the state's 911 system by:

- Providing a method for 911 centers and service providers to recover their costs.
- Providing standards for 911 centers and telecommunications providers to meet.
- Coordinating 911 services statewide.
- Being technology-neutral with respect to the types of devices that can contact 911 centers.
- Allowing the 911 system to better meet the expectations of the public.
- Providing for better-trained 911 dispatchers.
- Allowing the 911 centers to have access to the latest technology.

These objectives were to be supported by the creation of a revenue source that was designed to relieve the state's property tax burden by having each communications "user" help to pay the costs of 911 service. This was to be done by creating a new fee capped at \$0.75 per line per month on all communications service connections. This proposal was included in the 2009-11 state budget as passed by the Legislature. However, because of the budget deficit that existed at that time, the proposal included a two-year delay in the implementation of the 911 proposal. During that two-year period of time, the revenue from the new \$0.75 fee was to be distributed to the general fund to partially offset the deficit. Then-Governor Doyle vetoed the 911 proposal, but retained the \$0.75 fee to produce revenue for the general fund, and made the fee permanent. This fee is known as the "police and fire protection fee." It continues to be levied against communications service customers, and the revenue from this fee continues to be distributed to the state's general fund.

The committee considered recommending legislation that would eliminate or repurpose the police and fire protection fee. However, we felt that it would be inappropriate for this committee, with its limited study scope, to recommend fiscal policy that would leave a gap in revenue sources for the state's general fund. To avoid this problem, the committee proposed that only the revenue generated from the police and fire protection fee that is in addition to the average amount generated over the last two fiscal years be used for 911 support. The committee also recommended the revision of other existing funding sources to form the primary fiscal support for its recommendations.

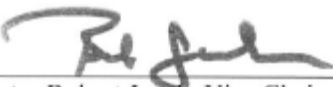

The committee feels strongly that the efforts of the people who crafted the vetoed 911 proposal described above were ignored, that people currently paying the police and fire protection fee on their monthly bills are being misled, and that the continued support of the general fund through this tax on telecommunications service is inappropriate. The Special Committee respectfully requests that you take action to eliminate the police and fire protection fee in favor of the uniform statewide 911 user fee proposed by the Special Committee, or that you repurpose this fee for 911 service and eliminate the current landline 911 user fee.

Thank you for your attention to this request, and please do not hesitate to contact us if you have any questions.

Sincerely,

Representative Joan Ballweg, Chair
Special Committee on 911 Communications

Senator Robert Jauch, Vice Chair
Special Committee on 911 Communications
