

STATE OF WISCONSIN
JOINT LEGISLATIVE COUNCIL

MAIL BALLOT
**Study Committee on the Regulation of Artificial
Intelligence in Wisconsin**

December 11, 2024

Motion: The chairperson seeks approval of the following recommendations to be included in the study committee's final report:

1. Instead of focusing on regulating the emerging technology that is artificial intelligence (AI), the Legislature should focus on ensuring that data, the raw material that powers AI, remains private and the consumer protected.

I vote **[YES ____]** **[NO ____]** to recommend that instead of focusing on regulating the emerging technology that is AI, the Legislature should focus on ensuring that data, the raw material that powers AI, remains private and the consumer protected.

2. The Legislature should learn from the experiences of other states and avoid the potential overreach of comprehensive AI legislation, and should instead prioritize high-risk areas susceptible to exploitation or abuse.

I vote **[YES ____]** **[NO ____]** to recommend that the Legislature should learn from the experiences of other states and avoid the potential overreach of comprehensive AI legislation, and should instead prioritize high-risk areas susceptible to exploitation or abuse.

3. The Legislature should ensure that existing laws apply to AI models in the same way that those laws apply to individuals, but should avoid creating duplicative statutes that unnecessarily single out AI.

I vote **[YES ____]** **[NO ____]** to recommend that the Legislature should ensure that existing laws apply to AI models in the same way that those laws apply to individuals, but should avoid creating duplicative statutes that unnecessarily single out AI.

Co-Chairs

Chris Kapenga | Senate President
Nancy VanderMeer | Representative

Legislative Council Staff

Anne Sappenfield | Director

4. The Legislature should ensure that programs related to education and workforce development, such as Fast Forward, have a scope that is broad enough to include AI upskilling, training, and education; are funded accordingly; and work to address any disparity in access between rural and urban communities.

I vote **[YES ____]** **[NO ____]** to recommend that the Legislature should ensure that programs related to education and workforce development, such as Fast Forward, have a scope that is broad enough to include AI upskilling, training, and education; are funded accordingly; and work to address any disparity in access between rural and urban communities.

5. The Legislature should consider establishing a permanent study committee, new legislative standing committee, or inter-branch commission to review emerging technologies, including AI, and make legislative recommendations regarding the same.

I vote **[YES ____]** **[NO ____]** to recommend that the Legislature should consider establishing a permanent study committee, new legislative standing committee, or inter-branch commission to review emerging technologies, including AI, and make legislative recommendations regarding the same.

6. The Legislature should, as AI technology advances, examine and invest in technology powered by AI that will assist with public safety, such as gun detection software.

I vote **[YES ____]** **[NO ____]** to recommend that the Legislature should, as AI technology advances, examine and invest in technology powered by AI that will assist with public safety, such as gun detection software.

7. The Legislature should direct the Executive Branch to promulgate administrative rules to establish clear, consistent guiding principles for state-level AI governance and to provide the Legislature with oversight regarding the state's procurement, development, and use of AI.

I vote **[YES ____]** **[NO ____]** to recommend that the Legislature should direct the Executive Branch to promulgate administrative rules to establish clear, consistent guiding principles for state-level AI governance and to provide the Legislature with oversight regarding the state's procurement, development, and use of AI.
