

HIGHLIGHTS OF CONSERVATION AND RECREATION IN WISCONSIN

Recreation — Wisconsin currently operates 48 state parks, 13 state forests, and 5 recreation areas. The parks range in size from Devil's Lake with 18,275 acres to Lakeshore with 22 acres. The largest single state recreational facility is the Northern Highland-American Legion Forest with 223,283 acres. A total of 36 state trails are open to the public.

Visitors to Wisconsin's state parks, forests, trails, and recreation areas numbered nearly 15.6 million in 2012.

Hunting and fishing are major recreational activities. In recent years, approximately 33 million fish and between 2 and 4 million game animals of various species have been harvested annually. Over 664,000 resident annual fishing licenses were sold in 2011. In addition, resident husband and wife fishing licenses totaled nearly 229,000, and nonresident fishing licenses totaled approximately 280,000. Almost 630,000 boats were registered in 2011.

Land Acquisition — Three land acquisition programs have been established to acquire land for recreational purposes. From 1961 through 1992, the Outdoor Recreation Act Program (ORAP) acquired 555,816 acres for the state's conservation and recreation programs at a cost of almost \$172 million. From fiscal year 1990, when the legislature created the Warren Knowles-Gaylord Nelson Stewardship Program, through fiscal year 1999, the stewardship fund spent over \$124 million to acquire an additional 167,000 acres. From fiscal years 2000 through 2012, the Stewardship 2000 Fund acquired over 397,000 acres and spent nearly \$450 million.

Natural Resources Funding and Expenditures — The Department of Natural Resources spent over \$467 million on conservation and recreation programs in fiscal year 2011-12, down from \$500 million in fiscal year 2010-11. Funding comes from the state's general fund and segregated funds, including registration and licensing fees, park stickers, and federal aids.

The following tables present selected data. Consult footnoted sources for more detailed information about conservation and recreation.

¹Harvest is the actual number of fish caught and kept; catch is the estimate of all fish caught, including those released. All fish species estimated from mail survey conducted in 2006. Great Lakes totals estimated by on site creel surveys in 2011 and 2012.

²Estimates based on hunter surveys.

³Harvest data from U.S. Fish and Wildlife Service, Division of Migratory Bird Management. Data is for the 2010-2011 hunting season.
