Section 145.14, Stats., grants the Department authority to promulgate rules governing plumbers.

5. Summary of Proposed Rules.

Chapter Comm 5 of the Wisconsin Administrative Code contains the Department’s rules for the issuance and renewal of numerous credentials which businesses and individuals are either mandated or permitted to obtain. These credentials are licenses, certifications and registrations that relate to activities associated with the construction and inspection of buildings and structures or specific components and elements that serve buildings and structures.

The proposed rules consist of revisions in chapter Comm 5 in order to address some administrative inconsistencies and oversights that have occurred since the last major update of chapter Comm 5. The time period during which a certified welder may perform the welding procedures for which the welder is certified is being increased from 3 years to 4 years. Likewise, the time period for maintaining the records of those individuals who passed a structural welding test is being increased from 4 years to 5 years. Additionally, a rule is created to require certified welders to identify the welding on structurally significant members. The proposal deletes the rule relating to advertising as certified electrical contractors or electricians. The proposed rules also include a requirement for certain persons licensed as master plumbers-restricted appliance to complete an educational course on multipurpose piping systems that they are allowed to install.

6. Summary of, and Comparison with, Existing or Proposed Federal Regulations.

The proposed rules address administrative issues unique to the department’s rules. There are no existing or proposed federal regulations that address the activities to be regulated by the proposed rules.

7. Comparison with Rules in Adjacent States.

The proposed rules address administrative issues unique to the department’s rules. There are no similar rules in the states of Illinois, Iowa, Michigan and Minnesota.

8. Summary of Factual Data and Analytical Methodologies.

There were no factual data or analytical methodologies used to develop the proposed rules.

9. Analysis and Supporting Documents Used to Determine Effect on Small Business or in Preparation of Economic Impact Report.

The proposed rules should have a minimal effect on small business. There were no supporting documents used to determine the effect on small business, and an economic impact report was not prepared.
