

Clearinghouse Rule 12-041

**PROPOSED ORDER OF THE STATE OF WISCONSIN
DEPARTMENT OF TRANSPORTATION
ADOPTING RULES**

The Wisconsin Department of Transportation proposes an order to amend Trans 200.06 (7)(b)3.a., relating to the erection of signs on public highways.

Analysis Prepared by the Wisconsin Department of Transportation

Statutes interpreted: s.86.195, Stats.

Statutory authority: s. 86.195, Stats.

Explanation of agency authority: The Department of Transportation may authorize the erection and maintenance of a specific information sign upon the request of any person within the right-of-way of a federal-aid primary highway or within the right-of-way of a federal-aid secondary highway under the jurisdiction of the department in accordance with s. 86.195, Stats.

Related statute or rule: s. 86.195 and Trans 200.06

Plain language analysis: This proposed rule-making would re-word Trans 200.06(7)(b)3.a., relating to the number of business logo panels allowed on specific information signs at interchanges when fewer than 6 qualified facilities are available in one or more of the categories of GAS, FOOD, LODGING, CAMPING and ATTRACTIONS. Business logo panels for 2 categories of motorist services may be displayed on the same information sign with certain limitations. This proposed rule increases flexibility, allowing more businesses to participate while making optimal use of existing structures.

Summary of, and preliminary comparison with, existing or proposed federal regulation: By allowing more flexibility, more businesses could participate in the Specific Information Sign program. This rule change is consistent with the 2009 Federal Manual on Uniform Traffic Control Devices (MUTCD) adopted by WisDOT.

Comparison with Rules in the Following States:

Michigan: The categories allowed in Michigan are Gas/Diesel, Food, Lodging Camping and 24-hour Pharmacy's. When displaying logo panels for multiple categories, Michigan complies with the 2009 MUTCD: When 2 types of services are displayed on one sign, the logo sign panels shall be limited to either 3 for each motorist service type (for a total of 6 sign panels), or 4 of 1 motorist service type and 2 of the other motorist service type (for a total of 6 sign panels).

Minnesota: Logo signs can be installed on Interstate highways and certain freeways in the Minneapolis/Saint Paul area. Other highways are ineligible. The signs are located at interchanges, not intersections.

GAS, FOOD, LODGING and CAMPING businesses may advertise on logo signs. These businesses provide essential motorist services, according to the Federal Highway Administration (FHA). When displaying logo panels on Interstate highways and certain freeways, Minnesota's logo program complies with the 2009 MUTCD, which allows 4 of 1 motorist service type and 2 of the other motorist service type (for a total of 6 sign panels).

Illinois: The Illinois Department of Transportation (IDOT) administers a Business Logo Signing Program along various Interstate highways and other freeways. This program involves mounting gas, food, lodging, camping business, and 24-hour pharmacy signs, referred to as logos, on large blue-background panels in advance of interchange exits and along exit ramps to alert motorists to available motorist services.

The program includes all sections of Interstate highways and other freeways except those passing through densely populated urbanized areas where logo signing would overload motorists with information that is not essential to their safe travel. It does not apply to highways under the jurisdiction of the Illinois State Toll Highway Authority.

Logo panels may be displayed to allow 3 business categories with 2 business logo panels from each category (for a total of 6 sign panels) on a single business sign structure. When 2 business categories are displayed on a single sign structure, 3 logo panels from each of the 2 business categories may be displayed, or 4 logo panels from 1 business category and 2 logo panels from another business category (for a total of 6 sign panels).

TOURIST ATTRACTION signs may be combined with business logo signs (Gas, Food, Camping and 24-Hour Pharmacy) on the same structure, with no more than 6 business logo panels displayed on any one structure. Tourist Attraction panels will not be combined with existing business service signs displaying more than 3 business logo panels. When tourist attraction signs are combined with business logo signs, one space will remain available for each business logo service type displayed on the structure.

This combination is different from what is suggested in the 2009 MUTCD.

Iowa: Iowa DOT requirements for mainline specific service signs erected in advance of an interchange, in a single direction of travel, and limitations regarding the numbers and types of business signs attached to these motorist service signs are as follows: Each mainline specific service sign is limited to 6 business logo panels. This restriction applies regardless of whether the specific service sign displays a single type of motorist service or a combination of motorist service types.

In general, only one type of motorist service should be displayed on each mainline specific service sign. However, the department may combine motorist service types on one sign for a reason such as, but not limited to, the following:

- (1) Each combination sign is limited to 6 business logo panels.
- (2) No more than 3 motorist service types shall be represented on any combination sign.
- (3) For a combination sign displaying 3 types of motorist services, the number of business logo panels for each motorist service type is limited to 2.
- (4) For a combination sign that will accommodate at least 4 business logo panels, each type of motorist service displayed on the sign must have at least 2 positions designated for that service type. This complies with the 2009 MUTCD.

Summary of factual data and analytical methodologies used and how the related findings support the regulatory approach chosen: The proposed rule change complies with the Federal Highway Administration Manual on Uniform Traffic Control Devices. When 2 types of motorist services are displayed on one sign, the logo sign panels shall be limited to either 3 for each motorist service type (for a total of 6 sign panels), or 4 of one motorist service type and 2 for the other motorist service type (for a total of 6 sign panels).

Analysis and supporting documentation used to determine effect on small businesses: By allowing a split of categories, with up to 4 business logo panels for one motorist service type and 2 business logo panels of another motorist service type, more businesses could simultaneously take advantage of using motorist service business logo panels. Subsequently, this would reduce the number of businesses on the waiting list for motorist services business logo panels at those particular interchanges or intersections. If more businesses are able to take advantage of this program, the Department anticipates this regulatory change will have a minor positive fiscal effect on small business.

Agency contact person and place where comments are to be submitted and deadline for submission: The public record on this proposed rule making will be held open for 14 days from the date of this order to permit the submission of comments. Any such comments should be submitted to John Noll, SIS/TODS Program Coordinator, Bureau of Traffic Operations, Traffic Engineering Section, Traffic Design Unit, Room 501, P. O. Box 7986, Madison, WI 53707-7986, or by calling (608) 266-0318. You may also contact Mr. Noll via e-mail at: john.noll@dot.wi.gov.

TEXT OF PROPOSED RULE

SECTION 1. Trans 200.06 (7) (b) 3.a. is amended to read:

Trans 200.06 (7) (b) 3.a. At interchanges where not more than 3 qualified facilities are available for each of 2 or more types of motorist services, business signs for 2 types of motorist services may be displayed on the same specific information sign. ~~Not more than 3 business signs for each type of motorist service may be displayed in combination on a specific information sign with 2 types of motorist services. When 2 types of motorist services are displayed on one sign, the business sign panels shall be limited to 3 for each motorist service type, or 4 for one motorist service type and 2 for the other motorist service type. Not more than 6 business sign panels may be displayed on one specific information sign. When it becomes necessary to display a fourth business sign for a type of motorist service displayed in combination, the business signs involved shall then be displayed in compliance with subds. 1. and 2.~~

(END OF RULE TEXT)

Effective Date. This rule shall take effect on the first day of the month following publication in the Wisconsin Administrative Register as provided in s. 227.22(2)(intro.), Stats.

Signed at Madison, Wisconsin, this ____ day of _____, 2012.

Mark Gottlieb, P.E.
Secretary
Wisconsin Department of Transportation
